Longitude 118.18235643

## **Questions 1 thru 9, answers;**

1. There is one abandon Sump. The sump was located in the middle of the tank farm. The tank farm has 3 500 barrel tanks. One Oil stock tank second a wash tank and third clean brine tank. The sump has been abandoned, it was a concrete lined sump 4'x4'x4' the sump was cleaned out to bottom. It was back filled with clean soil, compacted and the final 4" were cemented to the top of the sump. See attached photo.
2. Cleaning out the sump, backfilled with clean soil and cemented the top 4" with cement.
3. Approx 10 barrels. The sump was not used by P&M Oil. The water was collected Rain Water. The Taylor lease was purchased by P&M Oil in April, 1999, from El Cam Oil.
4. Rain water was removed from the sump using a company Vacuum Truck. The water would be then pumped into Taylor tanks, (wash tank) it would go thru the process into the clean brine tank. Then shipped to Oil Operators.
5. There was not any solids, in the Sump.
6. Within a half mile there are no commercial water wells. There is one at Long Beach Water Department, 1800 E. Wardlow Rd. Long Beach, CA 90807 IT IS 3,901.21 FEET from the Taylor abandon Sump.
