Re: Technical Report Pursuant to California Water Code Directive Section 13267  
Owner: Jean Martinez

Gentlemen/Ladies:

Pursuant to your letter requesting a template Spreadsheet one has been attached to this letter. Please be advised that the owner, Jean Martinez, only has one small well located in DOGGR district. This well does NOT have a sump on it and it does NOT use a sump. NO discharges occurred during the period in which Jean Martinez owned and/or operated within the oil fields she operated in.

All water produced from this well is trucked to a licensed disposal company, Anterra. The well usually produces 25 barrels of water over two to four months. We have recently updated all the tanks at the well. There is no leakage of water on this well site. The following information is provided for your use along with the spreadsheet:

1. There are no current or historic sumps in our area of operations. Therefore, there is no liner material used. As there were no sumps, there has been no clean-up of a sump.
2. There are no sumps.
3. No sumps and therefore no fluid was discharged into a sump.
4. No fluids discharged.
5. No sump therefore no solidified waste.
6. No sump therefore location of water wells nearby is not relevant.
7. There is no current or historic sump; therefore, water well information nearby is not relevant.
8. No sump. No sampling of water.
9. No sump. No monitoring wells.

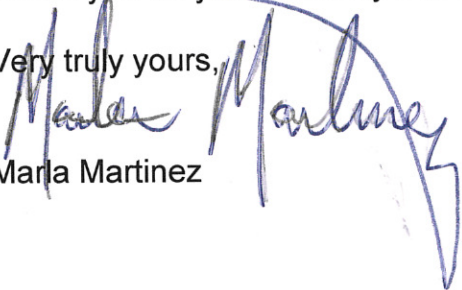

I, Marla Martinez, certify under penalty of law that I have personally examined and am familiar with the information submitted in this document and all attachments and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate, and complete. I am aware that there are

significant penalties for submitting false information, including the possibility of fine and imprisonment.

Thank you for your courtesy and cooperation in this matter.

Very truly yours,

Marla Martinez

ATTACHMENT "A"

WATER QUALITY ANALYSIS

There are no ground water samples collected from this well as there is no leakage or sump for this well.

WATER QUALITY REPORTING

None information available as there is no sump nor any ground water to collect
