Maryam,

This will inform you that I no longer dispose anything into the Timber Canyon Oil Field two sumps. In fact the disposal mentioned in the technical report that was provided early this year was the only time anything was deposited in the sumps in 18 years and was a onetime event, never to be repeated. Additionally, I wish to further inform you that we have in the past and will continue to have any products produced by our operations other than crude will be removed by Vacuum truck.

We use only local outside certified vendors who transport to regulated facilities approved for this operation.

Thank you for your concerns,

Sincerely,

Mike Evans, Operator
