Los Angeles Regional Water Quality Control Board  
Joshua Cwikla  
320 West 4<sup>th</sup> Street  
Los Angeles, CA 90013

Dear Mr. Cwikla,

In response to California water code directive pursuant to Section 13267, there have been no discharges of well drilling fluids, well completion fluids or production fluids to land during the time Chemassist, LLC has owned and operated its leases in the Sespe, Shiells Canyon and South Mountain fields of Ventura county. All oil and water from the producing wells on the leases are separated into storage tanks. Oil is transported via tanker truck to a refinery. Approximately 2,540 barrels of oil are produced per year. All produced water is transported by truck to Anterra Energy, a disposal facility located in Oxnard. All deliveries are accompanied with Hazardous Waste Manifest documents that are filed at our office. Approximate volume of produced water per year is 325 barrels.

I, Mark Wade, certify under penalty of law that I have personally examined and am familiar with the information submitted in this document and all attachments and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe the information is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

Respectfully,

Mark Wade  
Managing Member
