

# Honey's Little Angel Daycare Center Parent Meeting

Los Angeles Regional Water Quality Control Board  
November 15, 2011

Sam Unger, PE  
Executive Officer

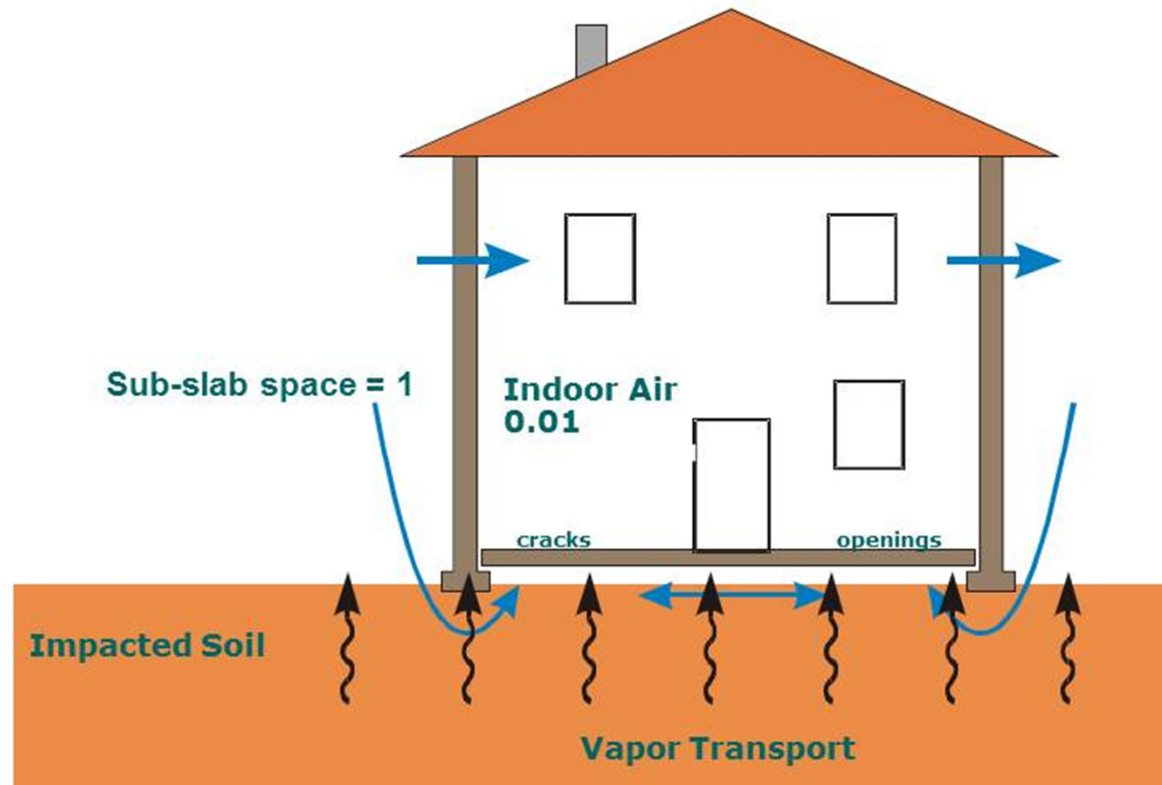

# What is Soil Gas?

Soil gas are vapors that collect in tiny pore spaces between soil particles.

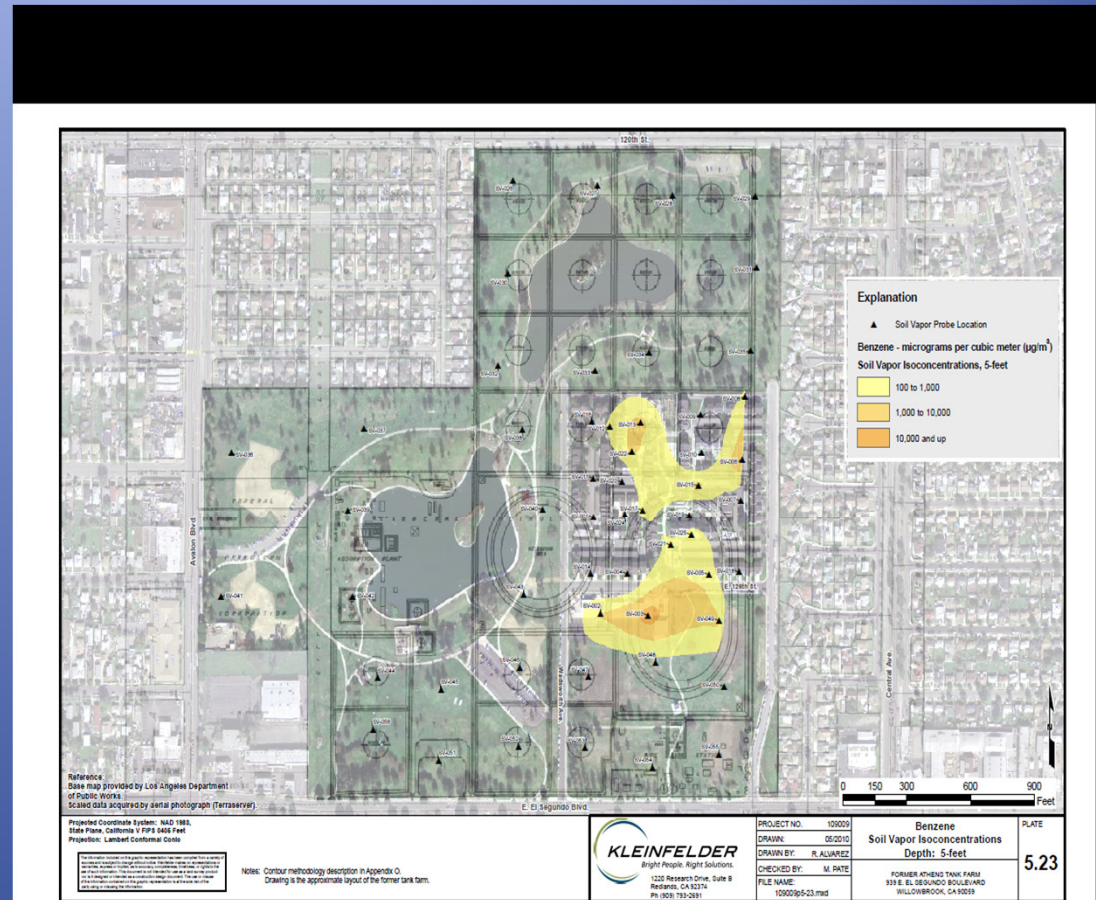

# How are people exposed to soil gas?

## VAPOR INTRUSION

# Is there soil gas contamination under the Daycare?

- No Detection of Benzene & Hexane
- Methane detected, but below thresholds
- Monitoring to make sure methane does not become problem

# Daycare Relocation

- Proactive to move daycare
- Future clean-up of environmental soil & groundwater contamination
- Working together find a new location in the neighborhood
