In re:

STATE WATER RESOURCES CONTROL BOARD

REGULATORY ACTION:

Title 23, California Code of Regulations

Adopt sections 3939.16

NOTICE OF APPROVAL OF REGULATORY
ACTION

Government Code Section 11353

OAL File No. 05-1110-02 S

This amendment to the Water Quality Control Plan for the Los Angeles Region (Basin Plan) establishes a Total Maximum Daily Load (TMDL) for toxicity, chlorpyrifos, and diazinon in Calleguas Creek, its Tributaries, and Mugu Lagoon. The amendment also revises the table of contents and adds introductory text for Chapter 7 (Total Maximum Daily Loads). Additionally, the Basin Plan amendment specifies final waste allocations (WLAs) for point source discharges and load allocations (LAs) for nonpoint source discharges of chlorpyrifos and diazinon. The Basin Plan also specifies WLAs and LAs for toxicity. The TMDL establishes an implementation plan for reducing toxicity, chlorpyrifos, and diazinon loads from point-sources and nonpoint-sources which includes a monitoring program, special studies, and a compliance schedule to meet final WLAs in 2 years after the effective date of the TMDL for point sources and final LAs in 10 years after the effective date of the TMDL for nonpoint sources.

OAL approves this regulatory action pursuant to section 11353 of the Government Code.
