

Resolution No. R1-2014-0006
Attachment 3

[Add a new sub-section to the Water Quality Control Plan for the North Coast Region implementation chapter (Chapter 4) with the following Action Plans. This section will be added after the "ACTION PLAN FOR THE KLAMATH RIVER TOTAL MAXIMUM DAILY LOADS ADDRESSING TEMPERATURE, DISSOLVED OXYGEN, NUTRIENT, AND MICROCYSTIN IMPAIRMENTS IN THE KLAMATH RIVER IN CALIFORNIA AND LOST RIVER IMPLEMENTATION PLAN." In addition to adding the following language, several editorial revisions will be made, including appropriate changes to the Title Page, Table of Contents, Summary of Basin Plan Amendments (Appendix 1), page numbers, table and figure numbers, footnote numbers, and headers and footers to reflect the new language. The final locations of tables and figures in relation to the text may also be changed to accommodate the existing formatting of the Basin Plan.]

ACTION PLAN TO ADDRESS ELEVATED WATER TEMPERATURES IN THE EEL RIVER WATERSHED

The USEPA has established Total Maximum Daily Loads (TMDL) for elevated temperature in the Upper Main Eel, Middle Main Eel, Lower Main Eel, South Fork Eel, North Fork Eel, and Middle Fork Eel River Watersheds¹. All of those temperature TMDLs have assigned temperature load allocations corresponding to solar radiation loads that occur when the riparian vegetation is at full potential growth conditions, with allowances for the effects of natural factors that act to reduce those potential growth conditions. The goal of this Action Plan is to establish actions that achieve those TMDL load allocations. The following actions constitute the program of implementation to achieve the Eel River Watershed Temperature TMDLs and are consistent with the *Policy for the Implementation of the Water Quality Objectives for Temperature*.

Table 4-19: Actions to Address Temperature Impairments in the Eel River Watershed

Source or Land Use Activity and Responsible Party	Implementation Actions
Timber Harvest Activities on Non-Federal Lands Regional Water Board	<u>Action</u> Regional Water Board staff shall make recommendations for additional measures to ensure the TMDL load allocations and water quality objectives for temperature are achieved during the timber harvest review process, as necessary. <u>Timeline</u> Ongoing
Timber Harvest Activities on Non-Federal Lands Parties conducting timber harvest activities that discharge waste or have the potential to discharge waste	<u>Action</u> Implement riparian management measures that meet the riparian shade allocations and water quality standards. Where the Forest Practice Rules are not sufficient to meet the TMDL allocations or water quality standards, implement additional measures as directed by Regional Water Board staff during the timber harvest review process. <u>Timeline</u> Ongoing

¹ Upper Main Eel River and Tributaries (including Tomki Creek, Outlet Creek and Lake Pillsbury) Total Maximum Daily Loads for Temperature and Sediment (2004), Middle Main Eel River and Tributaries (from Dos Rios to South Fork) Total Maximum Daily Loads for Temperature and Sediment (2005), Lower Eel River Total Maximum Daily Loads for Temperature and Sediment (2007), South Fork Eel River Total Maximum Daily Loads for Sediment and Temperature (1999), North Fork Eel River Total Maximum Daily Loads for Sediment and Temperature (2002), and Middle Fork Eel River Total Maximum Daily Loads for Sediment and Temperature (2003), each contain a problem statement, source analysis, numeric targets, load allocations, linkage analysis, and margin of safety. Please see the individual TMDL documents for more information.

4. IMPLEMENTATION PLANS

Table 4-19: Actions to Address Temperature Impairments in the Eel River Watershed

Source or Land Use Activity and Responsible Party	Implementation Actions
<p>All Activities on USFS Lands</p> <p>Regional Water Board</p>	<p><u>Action</u> Implement Order No. R1-2010-0029, <i>Waiver of Waste Discharge Requirements for Nonpoint Source Discharges Related to Certain Federal Land Management Activities on National Forest System Lands in the North Coast Region</i>, and any future revisions, (USFS Waiver of WDRs) as a mechanism for compliance with the water quality objectives for temperature.</p> <p><u>Action</u> Regional Water Board staff shall make recommendations for additional measures to ensure the water quality objective for temperature is achieved during the project review process, as necessary.</p> <p><u>Timeline</u> Ongoing</p>
<p>All Activities on Lands Managed by the USFS</p> <p>USFS</p>	<p><u>Action</u> Conduct land management activities in compliance with the USFS Waiver of WDRs and in accordance with project-level recommendations.</p> <p><u>Timeline</u> As required in the USFS Waiver of WDRs.</p>
<p>Agricultural Activities on Non-Federal Lands</p> <p>Regional Water Board</p>	<p><u>Action</u> Develop and implement the Agricultural Lands Discharge Program as a mechanism for compliance with temperature objectives.</p> <p><u>Timeline</u> Upon adoption</p>
<p>Agricultural Activities on Non-Federal Lands</p> <p>Parties conducting activities associated with agriculture that discharge waste or have the potential to discharge waste on nonfederal land, except dairies.</p>	<p><u>Action</u> Implement riparian management measures that meet the riparian shade load allocations and water quality standards.</p> <p><u>Timeline</u> Ongoing</p> <p><u>Action</u> Conduct land management activities in compliance with the Agricultural Lands Discharge Program when adopted.</p> <p><u>Timeline</u> Upon adoption of the Agricultural Lands Discharge Program</p>

Source or Land Use Activity and Responsible Party	Implementation Actions
<p>Dredge and Fill Activities in Waters of the State</p> <p>Regional Water Board</p>	<p><u>Action</u> Incorporate measures to meet the temperature allocations in 401 water quality certifications.</p> <p><u>Timeline</u> Ongoing</p>
<p>Waste Discharge Requirement Program</p> <p>Regional Water Board</p>	<p><u>Action</u> Incorporate measures to meet the temperature allocations and water quality objectives for temperature in Waste Discharge Requirements and Waivers thereof.</p> <p><u>Timeline</u> Ongoing</p>
<p>Water Use</p> <p>Regional Water Board</p> <p>State Water Resources Control Board, Division of Water Rights</p>	<p><u>Action</u> Work with other agencies and non-governmental organizations to support off-stream storage projects for water diverters currently diverting directly from streams during summer. Work with other agencies and non-governmental organizations to streamline the permitting process for conversion of on-stream to off-stream storage.</p> <p><u>Timeline</u> Ongoing</p>
<p>Water Use</p> <p>Water users</p>	<p><u>Action</u> The Regional Water Board encourages all water users to implement water conservation practices and develop off-stream storage facilities to minimize water diversions during low flow periods.</p> <p><u>Timeline</u> Ongoing</p>
<p>Water Use</p> <p>Regional Water Board</p> <p>State Water Resources Control Board, Division of Water Rights</p>	<p><u>Action</u> Pursue instream flow studies, including the following actions:</p> <ul style="list-style-type: none"> • Work with other agencies and non-governmental organizations to support instream flow studies to: (1) quantify flows necessary for beneficial use support, (2) quantify flow impacts to assist outreach and education efforts, or (3) identify opportunities to increase summer low flows. • Coordinate with the California Department of Fish and Wildlife on the development, methodologies, and any criteria relevant to instream flow studies. • Consider all sources of water, including headwaters, groundwater, and waters flowing in subterranean streams. <p><u>Timeline</u> Until complete</p>

Table 4-19: Actions to Address Temperature Impairments in the Eel River Watershed

Source or Land Use Activity and Responsible Party	Implementation Actions
Water Use Regional Water Board State Water Resources Control Board, Division of Water Rights	<u>Action</u> Support third-party efforts to address temperature related concerns, including: <ul style="list-style-type: none"> • Education of water users on the importance of water conservation efforts, • Education of water users on water conservation practices and opportunities, • Assistance for water users in the implementation of water conservation practices, • Restoration of riparian vegetation, • Other efforts that address water temperature-related concerns. <u>Timeline</u> Ongoing
Water Use Regional Water Board State Water Resources Control Board, Division of Water Rights	<u>Action</u> Take actions to address the temperature impacts of marijuana cultivation through the following: <ul style="list-style-type: none"> • Outreach and education, • Grant support for water conservation and pollution control efforts, • Coordination with other agencies, • Enforcement actions. <u>Timeline</u> Ongoing
Water Use Regional Water Board	<u>Action</u> Continue to coordinate with the State Water Board's Division of Water Rights by participating in the water right application and petition process, providing monitoring recommendations, conducting joint inspections as appropriate, submitting data in support of 401 certifications related to water diversions and/or facilities regulated by the FERC, participating in instream flow studies, participating in proceedings related to instream flow, and participating by any other appropriate means to help ensure that the terms of water right permits and licenses are consistent with the intrastate water quality objective for temperature. <u>Timeline</u> Ongoing

ACTION PLAN TO ADDRESS ELEVATED WATER TEMPERATURES IN THE NAVARRO RIVER WATERSHED

The USEPA has established Total Maximum Daily Loads (TMDL) for elevated temperature in the Navarro². The Navarro River Watershed Temperature TMDL has assigned temperature load allocations corresponding to solar radiation loads that occur when the riparian vegetation is at full potential growth conditions, with allowances for the effects of natural factors that act to reduce those potential growth conditions. The goal of this Action Plan is to establish actions that achieve those TMDL load allocations. The Navarro River Watershed Temperature TMDL also identifies the alteration of flow as a factor that may elevate water temperatures in some situations, and sets a
