Case Number 1TTR072

Trinity County

Notice Posting Date: December 21, 2021

End of Comment Period: February 21, 2022

A soil and groundwater investigation was conducted at the above-referenced site and a release of petroleum hydrocarbons was documented. Although some contamination remains, this site meets the conditions for closure under the State Water Resources Control Board's "Low-Threat Underground Storage Tank Case Closure Policy." North Coast Regional Water Quality Control Board (Regional water Board) staff proposes that no further work be required. The purpose of this notice is to inform interested parties, including owners of nearby land, that the case is being considered for closure, and to invite public comment on this proposed decision.

Problem Description

An unauthorized discharge of petroleum hydrocarbons was discovered at the site during the removal of underground storage tanks. Additional soil and groundwater investigation was conducted to define the extent of contamination. The site investigations determined the extent of contamination was limited and no petroleum impact to groundwater was found.

Proposed Action

Case closure is proposed. This site meets the conditions for closure under the State Water Resources Control Board's "[Low-Threat Underground Storage Tank Case Closure Policy](#)."

Unless significant comments are received or new information is presented regarding this site, Regional Water Board staff plans to proceed with the closure process upon conclusion of the comment period.
