Overview

Section 13240 of the Porter-Cologne and Section 303(c)(1) of the Clean Water Act require a review of basin plans at least once each three-year period to keep pace with changes in regulation, new technologies, policies, and physical changes within the region. The Regional Water Board is responsible for reviewing the Basin Plan, and is required to: 1) identify those portions of the Basin Plan, which are in need of modification or new additions; 2) adopt standards as appropriate; and 3) recognize those portions of the Basin Plan, which are appropriate as written. The Regional Water Board solicits written and oral public input, which it considers prior to adopting by resolution a prioritized list of basin planning projects. The highest priority projects

establish the workplan of the Regional Water Board's Planning Program for the next three year period.
