Subject: Comments on Dairy draft Conditional Waiver and other draft General Orders from UC
Attachments: UC comments on Conditional Waiver for Dairy RB1 Dec 5 2011.pdf

Cherie, Lisa, Mark and Matt:

Thank you for the opportunities over the last two years to provide input into the dairy regulatory process. This has been a long process and one requiring many minds to achieve water quality goals and provide a regulatory process that can be embraced by the regulated community.

Attached are both general and specific comments pertaining to the Conditional Waiver and the other General Orders. You will find our comments on the timeline on the first page and specific comments related to nutrient management in the NMP section.

Please do not hesitate to inquire if additional input is needed.

Planning meetings for the educational process will begin this week. On behalf my colleagues with UC and the Partners in the California Dairy Quality Assurance Program, I look forward to working very closely with you during the next few months to be sure we have correct and understandable information available to dairy producers in a timely fashion.

Sincerely,

Deanne
