NOTICE OF DETERMINATION

Sonoma County Department of Transportation and Public Works
2300 County Center Drive, Suite B 100, Santa Rosa, CA 95403
(707) 565-2231 Fax (707) 565-2620

Pursuant to Section 21152 of the Public Resources Code, this form constitutes the **Notice of Determination** indicating the action and environmental findings adopted by the County of Sonoma for the project described below.

Project Title: Reopening of the Central Disposal Site

Project Location/Address/APN: 500 Mecham Road, Petaluma

Lead Agency: Sonoma County

Decision Making Body: Sonoma County Board of Supervisors

Date of Approval: June 12, 2012

Project Applicant: Sonoma County Department of Transportation and Public Works

Department File Numbers: N/A

State Clearinghouse Number: 1995073068

Project Description: The County proposes to construct new waste cells within the currently permitted footprint of the Central Disposal Site, and complete waste disposal operations in accordance with all applicable regulatory and permit requirements. The following areas are proposed to receive waste as part of this project: the remaining phases of Landfill 2 (Phases III, IV and V), the Compost Area of Landfill 1, and the Rock Extraction Area (within the 1971 permitted footprint). No change in operations from those already analyzed in prior environmental documents are proposed, other than incorporating more protective liners in the construction of landfill cells, and the addition of a "preferential pathway" system in areas where the liner system abuts and overlaps Landfill 1, in order to direct leachate to the leachate collection system. These are additional environmental protections above those described in prior environmental documents.

An EIR was certified for the Central Disposal Site Improvement Program in 1998. The 1998 EIR analyzed a general improvement program to provide solid waste disposal capacity at the Central Disposal Site. In addition, an EIR was certified for the Central Disposal Site Rock Extraction Project in 1998, which analyzed a project to remove rock and create an additional eight months of landfill capacity. The County has prepared an Addendum to the Central Disposal Site Improvement Program EIR, and incorporates, by reference, the Central Disposal Site Rock Extraction EIR. The Addendum concluded that none of the circumstances or conditions identified in Public Resources Code section 21166 and CEQA Guidelines section 15162 have been met requiring preparation of a subsequent EIR.

This is to advise that the Sonoma County Board of Supervisors has approved the above described project and has made the following determinations:

1. An Addendum to the 1998 Central Disposal Site Improvement Program EIR was prepared for this project pursuant to the provisions of CEQA.
2. The project will not have a significant new effect or substantially more severe effect on the environment than previously examined in the 1998 EIR.

3. A mitigation monitoring program was not adopted for this project.
4. A statement of overriding considerations was not adopted for this project.
5. Findings were not made pursuant to CEQA Guidelines section 15091.

The environmental documents and record of approval may be examined at the office of the Sonoma County Department of Transportation and Public Works, 2300 County Center Drive, Suite B 100, Santa Rosa, California. For more information, contact Sheryl Bratton at (707) 565-2421.

A handwritten signature in black ink, appearing to read "Susan R. Klassen". The signature is fluid and cursive, with a large initial "S" and "K".
