Subject: WATER

THE KLAMATH RIVER KEEPERS WANTS TO REMOVE DAMS..(BAD IDEA) THE DAMS KEEP WATERS IN GOOD YEARS AND PREVENT FLOODING DOWN STREAM. MORE IMPORTANT FOR THE LONG TERM THEY HELP REPLENISH GROUND WATER ,AS THE WATER FILTERS THROUGH THE EARTH BELOW THE RESERVOIRS .THEY ALSO PROVIDE RECREATION..IF WE REMOVE THE DAMS ,IN HIGH WATER YEARS THERE WILL BE FLOODS..LOW WATER YEARS WILL THERE WILL BE NO RESERVE. WE MUST PRESERVE GROUND WATER..OUR FARMERS AND CONSUMERS NEED THE WATER.

FRACKING ,I USED TO THINK IT WAS A GOOD IDEA.. NOW I HAVE SERIOUS DOUBTS.ALTHOUGH THE WATER IS VERY DEEP ,WE MAY NEED IT SOME DAY..WHEN THE COMPANIES REFUSE TO TELL US WHAT CHEMICALS THEY USE,THERE IS NO WAY TO INVESTIGATE THE POSSIBLE OUT COMES..
