**Subject:** Public Workshop 2012 Integrated Report-Scott River

Good morning Rebeca and Katharine,

I would like to first state that even though I'm sending this via my City of Redding email and I'm the Storm Water Supervisor for the City, this is not City of Redding related nor is it coming from my official capacity. With that being said!

I attended the public information meeting April 10, 2014 and would like to thank you both and your team for all the effort and hard work all of you put into this process. More important I would like to apologies to both of you for the way some of the group attacked not only your department but were insulting and degrading to you personally! This character attack should have never happened! I know working for the government we can be subject to the somewhat skewed opinion of the people we work for but this was undeserved and uncalled for, again I'm sorry you were subject to this treatment.

I would like to make it clear that I have a vested interest in this water shed. Even though I live in Redding I was born and raised in Etna and my family who have been in the Scott Valley and Salmon River area for seven generation, many whom still live there are very concerned about the outcome of all these water bodies.

My Dad, now 80 has been involved in this battle for years and I will be having discussions with him to get his thoughts, ideas and more important some of the historical details he can recall. Once I have this information I will be passing it along to you and your office.

Again, it doesn't matter my political views, opinions or my thoughts on the regulations or this process! What matters is that we all need to deal with each other with respect and in a decent manner and you were not. You both handled yourselves very professionally with honor and décor and I commend you for that!!

Looking forward to further conversation.

Respectfully,

In The Trenches Together,

***JOHN STACHER***
