Date: Tuesday, October 06, 2015 12:30:17 PM

I am a homeowner on Fitch mountain outside of Healdsburg and wish to see our river kept clean. If a government agency came out and tested my septic system and found it to be polluting the river I would do everything within my power to correct that. But asking me to cover the cost of testing it or monitoring it when there's no indication that there's a problem is something I'm totally opposed to.

First of all, I don't know if I'm in the targeted area, there are no maps, no addresses within the plan. Secondly, I nor my neighbors have been notified of the plans requirements and cost and who would carry the burden of that cost. Without receiving this information and having the time to comment on it before the comment period is closed is a violation of our rights. Those who are going to be affected need to be individually notified of the changes and then given adequate time to comment. I heard about this only by chance in conversation.

Sincerely, Stephen Martin, 1561 South Fitch Mountain Road, Healdsburg California 95448
