Charles,

My Wife and I live in the Hacienda community along the Russian River. Our address is 11190 Dell Ave, Forestville, CA 95436

We attended one of the informational sessions and provided a bit of vocal comments, but I would like to express that we support the comments written by the Hacienda Improvement Association that has been submitted to you. I have attached a copy if for any reason you do not have it already.

We feel that the proposal places an unfair burden on homeowners in the area, while failing to address other major causes such as the transient population and tourism/rental businesses. I can only assume that homeowners are a fairly easy target compared to addressing these other contributors.

Lastly my household would like to express our gratitude that you are working towards solving this problem. While our community may be vocal against your initial plan, I am confident that you are able to make changes to address this matter in a method that is fair to everyone involved, without placing undue burden on one of many contributors.
