Dear Mr. Reed,

We are residents of the Hacienda Homeowners Association in Forestville. We support the letter that was sent to you on behalf of the association. We are part time summer residents and our cabin at 11358 McPeak road is a substantial distance from the river. We have already voluntarily upgraded our septic systems, as per county requirements at a substantial cost. These finding of the Hacienda area adding pathogens to the river are not substantiated, and by putting all of the residence into one category without properly researching where they are coming from is unfair. We hope that the board will remove the TMDL from the November meeting and continue to look into clarification of who is truly polluting the Russian River.

Thank You,

Dino and Cindy Antoniazzi
