Dear State Water Resources Control Board
cc: Marc Berman

I have lived in and loved California for 34 years. I am very concerned about water resource management in our bountiful state. You have the ability and authority to make the right decisions for lasting water quality and environmental stewardship - the two are intrinsically connected. Healthy, living rivers are essential for our survival, both ecologically and economically. At least 60% unimpaired flows during spring season on the San Joaquin River and its tributaries are needed to sustain California. Please act to protect our rivers and all the depend on them - everything depends on our rivers.

Most Sincerely,
Kit Gordon
Los Altos Hills, CA
