**Subject:** Your Water Plan For CA  
**Date:** Thursday, January 12, 2017 6:05:28 AM

---

What planet are you residing on? Your proposed water plan will be a disaster for our state and the people that reside in it. Historically CA has not had adequate water storage capacity and it doesn't look like any additional storage is in the plans even though we have experienced the worst drought in decades recently. Your plan to move additional water resources to the ocean to feed the fish is flat out ridiculous. Go back to the planning board and try again.
