Salton City, California, November 6<sup>th</sup> 2017

Dear who it may concern and authority to environment:

1. I am Homer Lesihau, resident of Salton City since 2013 and from San Diego, I served in MACV in Vietnam during the time, (1967-1969) the Government spayed Orange Agent and have been infected with it and have been suffering since then. But now I have an additional suffer by the environment of Salton City. The sand dirt were overwhelmed, in my house even I clean them every day and this has caused my serve allergy along with information from Orange agent! This has been affecting my normal daily living and working, with constant irritated eyes, running nose. I have been seeing Doctor and it seems that, it has little effect even with proper drugs.

The cause is for sure from dirt and the evaporation from the sea which is reseeding fast... At this time I am though reluctant but will seed more help from the legal side... (Many of local citizen friends are also seeking legal help, and hence, we feel our taxes are not spending properly)

I urge with good faith that the State and federal authority should do something to restore the Sea water level and monitor the air pollution and any thing that affect the environment here.

I would thank for any of your effort to do good as to restore the sea and control the air pollution.

Sincerely yours!
