Time is ticking for the Salton Sea!

As a resident of Salton City, I am reaching out to the waterboard to halt the QSA that is to take place at year end.

The Sea is a beautiful resource for the State of California and affects many residents and wildlife that surround the sea.

As a city official working for the residents of this state, you have a duty to stop the water transfer that scheduled and preserve what little water is still coming in to the sea.

If this QSA goes through, it will be detrimental to the health of the surrounding residents due to exposed playa and toxic sand that will be in the air when the wind blows. In addition, the birds and other wildlife that rely on this water source will be impacted dramatically.

It will not only impact the local residents, eventually will affect other populated areas such as Palm Springs and L.A. Then California will have a major crisis on their hands.

Water import is the only true long-term fix for our Salton Sea. Please support the water import plans. There are some very feasible plans out there to bring water back into our Sea via the Coyote Canal.

We can NOT lose this water source!

Again, as a concerned resident, I'm asking for your support to SAVE OUR SEA!

Thank you,

Pam Eckert
Salton City Resident
