SEP 3 0 2013

Emel G. Wadhani Senior Staff Counsel State Water Resources Control Board P.O. Box 100 Sacramento, CA 95812-0100

Dear Mr. Wadhani:

This is to provide clarification regarding EPA's August 14, 2013 letter to the California State Water Resources Control Board responding to the State Board's July 8, 2013 letter concerning alternatives for addressing receiving water limitations in National Pollutant Discharge Elimination System permits for Municipal Separate Storm Sewer Systems (MS4s). The State Board's July 8, 2013 letter asked questions about the applicability of the Los Angeles County MS4 permit to possible revisions to the State's receiving water limitations policy. I would like to ensure that EPA's comments are correctly understood in the context of the State Board's letter.

EPA did not and will not object to the issuance of the Los Angeles MS4 permit as issued by the Los Angeles Regional Water Quality Control Board on November 8, 2012. As discussed in our August 14th letter, the State Board's July 8th letter referenced the November 20, 2012 State Board workshop in which options for revising the statewide receiving waters limitation policy were discussed and in which EPA participated. The State Board letter requested comment on whether the approach taken in the Los Angeles MS4 permit is appropriate for inclusion as a compliance alternative in revisions to the statewide receiving water limitations policy. Our August 14, 20013 letter was solely intended to focus on possible revisions to the statewide receiving water limitations policy.

If you have questions concerning this letter, please call John Kemmerer at (213) 244-1832.

Sincerely,

Jane Diamond, Director Water Division

AUG 1 4 2013

Emel G. Wadhwani Senior Staff Counsel State Water Resources Control Board P.O. Box 100 Sacramento, CA 95812-0100

Re: SWRCB/OCC File A-2236(a) Through (kk)

Dear Mr. Wadhwani:

This letter is in response to the State Board's notice dated July 8, 2013 requesting comments concerning a compliance alternative for receiving water limitations (RWLs) in the final MS4 permit for Los Angeles County (NPDES permit No. CAS004001), issued on November 8, 2012 by the Los Angeles Regional Board. On November 20, 2012, the State Board held a workshop to consider options for revising the Board's WQ Order 99-05 which established statewide policy for RWLs language to be included in all MS4 permits. Your July 2013 notice requested comment on whether the compliance option in the 2012 LA County MS4 permit would be an appropriate alternative to WQ Order 99-05.

First, in a November 13, 2012 letter, EPA provided comments in response to the State Board's October 10, 2012 issue paper discussing alternatives to WQ Order 99-05. In our November 13, 2012 comments, we noted that we support alternatives which include more detail on how to implement the "iterative process" for improving stormwater controls. We also noted that we are concerned that removing the requirement to achieve water quality standards as described in Alternatives 4 and 5 would be significantly less protective and enforceable, and would not adequately ensure that appropriate actions are required to address the numerous California waters impaired by urban runoff.

In consideration of the adopted Los Angeles County MS4 permit, it is important to point out that the State Board's July 8, 2013 notice is incorrect in stating that under the LA County MS4 permit, "dischargers that are in compliance with the requirements and milestones of an <u>approved</u> watershed management program/enhanced watershed management program are also generally deemed to be in compliance with the Permit's receiving water limitations." (Emphasis added) In fact, the LA County MS4 permit provides that dischargers are deemed in compliance with RWLs when they provide notification to the Regional Board that they intend to prepare a watershed management program/enhanced watershed management program (WMP/EWMP), and upon completing other steps in the development of a WMP/EWMP. Dischargers may be deemed in compliance with RWLs for several years prior to approval of a WMP/EWMP.

During the development of its Regional MS4 permit, the San Diego Regional Water Quality Control Board drafted a similar option for consideration which would deem dischargers in compliance with RWLs if a planning program was implemented. This "Option 2" was, considered at the San Diego Regional Board's May 8, 2013 hearing. In contrast to the LA MS4 permit, the San Diego Regional Board's Option 2 would have applied only after the relevant planning documents were approved. Ultimately the San Diego Regional Board chose not to adopt Option 2, and maintained RWL language consistent with WQ Order 99-05. However, if implementation of a planning program is to be considered to replace RWL language, it is our strong preference that such alternative compliance be tied to plan approval as was drafted in the San Diego Regional Board's Option 2, rather than the approach adopted in the LA MS4 permit.

We appreciate the opportunity to provide our views on this matter. If you have any questions, please contact Eugene Bromley of the NPDES Permits Office at (415) 972-3510.

Sincerely,

Jane Diamond, Director Water Division
