Subject: ESJWQC E. coli, nutrient, inorganic and metals Exceedance Report-November 2011
Attachments: ESJWQC_ER_11_Metals_E.coli_Nutrients_Inorganics_November_110811.xls

Dear Susan,

As required in the Monitoring and Reporting Program (Order No. R5-2008-0005) for Coalition Groups, an Exceedance Report is being submitted to address the following issues a) the exceedances, b) the follow-up monitoring, and c) any analysis or other actions the Coalition Group may take to address the exceedance.

a.) On November 8, 2011, Normal Monitoring (NM) was conducted in the ESJWQC region. Water was collected for the analysis of physical parameters, nutrients, metals, and bacteria. There was one dry site during this sampling event (Cottonwood Creek @ Rd 20); all sites that were sampled were sampled as contiguous waterbodies. Final data for this event were received from the laboratory on December 29, 2011. Exceedances of receiving water limitations for *E. coli, *total dissolved solids (TDS), dissolved copper and nitrate-nitrite occurred. Details on the sites and constituents sampled and associated exceedances are provided in an excel spreadsheet attached to this email. Raw data are available upon request. Site pictures and flow data from this event were provided by email on November 10, 2011, and are also available on the MLJ-LLC Sharepoint website (<http://sharepoint.mlj-llc.com/mlj-db/database/forms/allitems.aspx>).

b.) Sampling occurred at sites in the ESJWQC region again on December 6, 2011.

c.) All new exceedances requiring Management Plans as well as Management Plan Monitoring results will be evaluated in the ESJWQC Annual Management Plan Update Report due April 1, 2012.

Michael Johnson

Thanks,

~~~~~
