Science Symposium Presentations – Jun. 28, 2022

Plenary Session Recording

Time	Topic
9:00 - 9:05	<p>Symposium and Webinar Logistics</p> <p><i>Greg Gearheart / Anna Holder</i></p> <p><i>State Water Resources Control Board</i></p>
9:05 - 9:20	<p>Welcome</p> <p><i>E. Joaquin Esquivel, Chair</i></p> <p><i>State Water Resources Control Board</i></p>
9:20 - 10:00	<p><i>Keynote Conversation</i></p> <p><i>Bidtah Becker, Deputy Secretary for Environmental Justice, Tribal Affairs and Border Relations</i></p> <p><i>California Environmental Protection Agency (CalEPA)</i></p> <p><u>California Water Board’s Safe and Affordable Funding for Equity and Resilience (SAFER) Program</u></p> <p><u>SAFER Program’s 2022 Tribal Outreach Plan</u></p>

Session 1: Implementing a Community Equity Lens - Tribal Case Studies Recording

Time	Topic
10:05 - 10:20	<p>Session welcome & California Water Data Challenge framing</p> <p><i>Greg Gearheart</i></p> <p><i>State Water Resources Control Board</i></p> <p><u>Office of Information Management and Analysis (OIMA)</u></p> <ul style="list-style-type: none"> • <u>Surface Water Ambient Monitoring Program (SWAMP)</u> • <u>California Water Boards Annual Performance Report</u> • <u>California Water Boards College of Water Informatics</u> <p><u>California Water Data Science Symposium Website</u></p> <p><u>California Water Data Challenge Website</u></p>

Time	Topic
10:20 - 10:40	<p>Innovation and inclusion: the CARE Principles in publicly funded projects <i>Andrew Martinez</i> <i>Collaboratory for Indigenous Data Governance</i></p> <p>Collaboratory for Indigenous Data Governance (Twitter: @IndigiDataLab) United States Indigenous Data Sovereignty Network (Twitter: @USIDSN) CARE Principles for Indigenous Data Governance (Twitter: @GidaGlobal)</p> <ul style="list-style-type: none"> • 3-page PDF <p>FAIR Guiding Principles for scientific data management and stewardship ENRICH: Equity for Indigenous Research and Innovation Coordinating Hub Local Contexts (Twitter: @LocalContexts)</p> <ul style="list-style-type: none"> • Notices <p>The University of Arizona Native Nations Institute (Twitter: @NNIarizona) Jennings. 2021. Indigenous data sovereignty: how researchers can empower data governance. California Water Data Science Symposium Presentation Recording Carroll et al. 2019. California Water Data Challenge Workshops – Jun. 28-30, 2022

Workshops were held on:

- Tue, Jun. 28, 2022 - 1:30 pm - 4:30 pm
- Wed, Jun. 29, 2022 - 9:30 am - 12:30 pm
- Thu, Jun. 30, 2022 - 9:30 am - 12:30 pm

Workshop participants met other potential California Water Data Challenge participants, begin to brainstorm project ideas, and form teams. Breakout groups were created during the Workshops, and participants used this [Jamboard](#) to capture some of their initial questions and ideas!

Breakout Groups

- Trash & Microplastics
 - [Trash AI Project Website](#) | [GitHub Repository](#)
 - [YOLO Computer Vision Framework GitHub Repository](#) | [Documentation](#)
 - [TACO Litter Image Dataset](#)
 - For more information or to join the team, join the [Code for Sacramento Brigade](#) and attend their [Weekly Virtual Meetings](#)
 - [Microplastics Data Portal GitHub Repository](#)
 - For more information or to join the team, contact: [Dr. Win Cowger](#)
- Equity & Government Representation
 - For more information or to join the team, contact: [Megan Fidell](#)
- Open Data Sharing
 - For information about Department of Water Resources datasets, contact: [Paul Shipman](#)
 - For information about California Water Boards datasets, contact: OIMA-Helpdesk@waterboards.ca.gov
- Gated access for data sharing
- Fire & protection of water resources
- Regulatory enforcement in disadvantaged communities
- Groundwater
- Data infrastructure & data models

Upcoming Events

Salmon Social Hour, Date and Location TBD

Once more details are available, we will share them via the [Water Boards College of Water Informatics Email List](#) (under the General Interests drop down).

[California Water Data Challenge, Jul. - Oct. 15, 2022](#)

While this year's California Water Data Science Symposium is over – the California Water Data Challenge has just begun! If you and/or your team has data-related skills to offer, please consider joining the Challenge as an individual or as a team. Community members experiencing water issues should join as mentors or community liaisons to guide the design and development of solutions.

[California Data Summit, Aug. 17-18, 2022, UC Irvine](#) | [Registration Link](#)

The CA Water Data Summit is back in person this year at UC Irvine in partnership with Water UCI! Join the California Data Collaborative on August 17-18th for two full days of networking and content.

- Day 1 will feature peer training workshops for public and private sector managers and analysts, led by data experts from some of California's leading water agencies.
- Day 2 continues the momentum with sessions highlighting how data is central to the water issues of today.

This is the event of the year for water districts, utilities, companies, non-profits, students, and researchers looking to better use data in the decision-making process in the water sector. The theme for this year's event is "Data 2.0: From Dreams to Discovery" to highlight the progress of water digitization and the value of dreaming big.

[California Aquatic Bioassessment Workgroup \(CABW\) Annual Meeting, Oct. 11-12, 2022, CalEPA Building, Sacramento, CA](#) | [Presenter and Poster Interest Form Due Jul. 30, 2022](#) | [Registration Link](#)

The California Aquatic Bioassessment Workgroup (CABW) and the California Chapter of the Society of Freshwater Science (Cal-SFS) are proud to collaborate and host the 29th annual CABW Annual Meeting and 10th annual Cal-SFS meeting! The purpose of this joint meeting is to exchange current and relevant bioassessment and freshwater science information among professionals, resource managers, policymakers, educators, students, and the public; network and build partnerships; and to support science-based policy and natural resource management to protect and restore California's freshwater aquatic ecosystems.

About The 2022 Mascot

Salmon are this year's mascot for the Symposium and Water Data Challenge kickoff. Salmon images bear significant power to convey the importance of caring for our lands and waters. For eons in what is now known as California, Indigenous communities have held – and continue to hold – deeply complex relationships with salmon and their watershed colleagues, including the Steelhead trout, Pacific lamprey, California condor, Pacific giant salamander, and many others. It is with great humility, respect, and reverence that we choose the salmon to guide us forward this year.

Did you know?

1. Four species of salmon can be found in California: Chinook (*Oncorhynchus tshawytscha*), Chum (*Oncorhynchus keta*), Coho (*Oncorhynchus kisutch*), and Pink (*Oncorhynchus gorbuscha*) (caltrout.org).
2. Although Chinook salmon currently spawn in the San Francisco Bay watersheds, they are officially regarded as non-native. A recent environmental DNA (eDNA) analysis of archaeological samples from a Native American midden in the city of Santa Clara dating back more than 200 years has provided evidence that the Chinook range may have in fact extended to the southern end of San Francisco Bay (fishbio.com).
3. Pacific salmon are the great redistributors and transfer large quantities of marine-derived nutrients to “upland” forest ecosystems with profound effects on plant and wildlife production – they feed “downstream” ecosystems, but they don’t extract from inland watersheds. They are an integral part of California's watersheds and their loss would not only impact riparian and ecosystem function, but also river systems where people and salmon coexist ([Merz and Moyle, 2006](#)).

Salmon are on the brink of extinction, this is widely known, but we are here to affirm that they are us and we are them. Salmon are changing to be more resilient for our collective future. You may notice that our salmon mascot is morphing, not only for spawning but for a future that is going to challenge what we all know and love. Salmon and how they have the power to organize and energize those around them is an inspiration. So let’s all listen to our ancestors – for they are also our future alevin and smolt – and use our collective power, energy, and data to inform and build a healthy, bright, resilient, and equitable future for all.

Thank you for joining the 2022 California Water Data Science Symposium!

Stay connected with the water data science community by:
