

# Endora

Symbiosis machines, humans and nature

Endora is an Artificial Intelligence Cognitive System that uses Collective Intelligence to monitor the nature

Canva

Just ask questions in Natural Language and Endora shows the info

Individual pulse of each parameter monitored

# Ask Endora

Real time monitoring  
of climate change

Info for your daily  
operations

Real time analysis  
including Scientific  
Researchs  
studies,etc

Easy Color Indicators

-Of all the signals monitored: ph, co2,  
wind, temperature, mercury, drought,  
rain, algae,,forest, water vs toxicity, el  
niño, la niña,fish, people, etc

-of the connections to the databases  
of the different simulations

User uploads  
of images and info via  
app in phone

Georeferenced  
objects and actions

Real time from aerial  
terrestrial and aquatic  
devices, satellites,etc

Remote Sensing

-of the connections to the databases  
of the different simulations

All the world is connected,  
like bubble in the water.

Multidimensional simulations:  
georeferenced,  
across the time,  
with possible scenarios

Endora Thinks, Looks for info, Analyze,  
Monit and gather data about the Climate  
Change.

Endora launch personalized warnings when  
any indicator increases, or is missing.

Endora can add visualizations from  
different sources.

Suppliers just set and enable connection

Ask Endora

A new hope
