

Robert Holmes

Robert is a biologist and received his M.S in Natural Resources from Humboldt State University in 2000. He is currently an Instream Flow Program Unit Supervisor in the Water Branch at the California Department of Fish and Wildlife (CDFW) and provides leadership to scientific staff in the planning and execution of instream flow studies throughout California. Robert is also currently the California representative on the national Instream Flow Council (IFC), and was elected the IFC Region 1 Director from 2014-2016. Robert has also led the development and implementation of the CDFW Instream Flow Quality Assurance Program, and has led efforts to train CDFW regional and program staff on common instream flow methods and models used by CDFW and other fish and wildlife agencies across the U.S. and Canada.
