Recycled Water Permits Fee Option

Option F: Fee by Type of Recycled Water Produced and Distribution/Use

For facilities producing recycled water consistent with California Code of Regulations, Title 22, a fee would be assessed based on the type of recycled water produced. The fee would distinguish between potable and non-potable recycled water produced and would be assessed as a surcharge for National Pollutant Discharge Elimination System (NPDES) Wastewater (WW) permits and Waste Discharge Requirements (WDRs) that contain recycling requirements and as a flat fee for Water Recycling Requirements (WRRs).

For permits for the distribution or use of recycled water (exclusive of production), the fee would be a flat fee.

Recycled Water Production	Potable Fee	Non-Potable Fee
Permits issued for recycled water production	\$16,000	\$2,800

Recycled Water Distribution and/or Use	Fee
Permits issued for recycled water distribution and/or use only	\$1,500
