Water Quality Certification Program Proposed Fee Structure Changes

Draft Fee Methodology Schedule Mock-Up

Tables 1 and 2 provide fee calculator mockups and tier breakdowns to illustrate the revised methodology and facilitate project fee estimation.

Table 1: A points calculator mockup showing the proposed fee factors, criteria, and point values.

		Total Points:	

Table 2: Point totals determine the fee tier, based on values from Table 1.

Fee Tier Determination

Fee Tiers:	(1) Baseline	(2) Minimal	(3) Moderate	(4) Significant	(5) Major
Point Ranges:	1	2	3	4-5	≥ 6

Fee Calculation

Using the factors in Table 1, the fee tier is determined using the point ranges in Table 2. The fee tier is then weighted by total impact size to determine the final fee amount.

Here is the structure of the proposed fee calculations with placeholder dollar amounts:

Fee Tier	Fee Calculation	Annual Fee
1 Baseline (1 point)	\$2,500 (Flat fee)	For All Fee Tiers: Projects less than or equal to 0.10 acre: \$563 annually Greater than 0.10 acre: \$3,540 annually for the first 5 years, then \$563 thereafter
2 Minimal (2 Points)	Total Impact Acres * \$23,000	
3 Moderate (3 Points)	\$2,500 + Total Impact Acres * \$23,000 *1.25	
4 Significant (4-5 Points)	\$2,500 + Total Impact Acres * \$23,000*1.5	
5 Major (6 or more Points)	\$2,500 + Total Impact Acres * \$23,000*2	

The annual fee would operate similarly to the current one, with low impact discharge projects receiving a reduced fee.

The fee amounts provided are illustrative estimates for each tier and are subject to change. Final amounts will be updated following the Governor’s May Revision and subsequent adoption of the State Budget Act and presented to the State Water Board for proposed adoption in the Fee Schedule.
