Ben,

Thank you for reaching out. Our biggest concern with the draft permit is the monitoring being required from the monitoring wells around the facility. When those were put in a number of years ago, they were monitored at that point and to the best of my knowledge no monitoring has been done since on those. The District does not have the ability to sample from those at this point, there are no pumps in those monitoring wells and if the District has to have an engineer come in to monitor it could become very costly to the District. If you could provide some advise and or recommendations on how to accomplish what is being asked, it would be much appreciated.

Also, Dave Redding or myself are planning on attending the public hearing if it is within a reasonable drive time from Ukiah. If you could provide us with the location of that, that would also be helpful.

Jared Walker

Hi Jared, I was wondering if you had any comments on the draft permit for Calpella? The draft permit will be considered in April, on either the 17th or 18th, do you or someone representing the treatment plant plan to attend?
