**Subject:** Comments May 8th Hearing

There is no question that the district **MUST** repair and replace pipe and include the funding in **THIS** budget cycle as well as in future years.

Perhaps it is possible to install a **RECEIVER** who can take control over the Board?

Since there is a history of non-compliance and no agreement reached between the Water Board Staff and the District staff, I am hopeful yet not convinced that the Water Board will issue a final order at the May 8<sup>th</sup> hearing. If they do not issue a final order my suggestion is to refer to the Attorney General (IF this will result in enforcement)
