

**Table 7.3.1-2 Total Maximum Daily Load of Pathogens Indicators for Tomales Bay and its Tributaries**

Waterbody	Indicator Parameter	TMDL (Most Probable Number (MPN) of fecal coliforms per 100 mL of water)
Tomales Bay	Fecal coliform	Median < 14 <sup>a</sup> 90th Percentile < 43 <sup>b</sup>
Major Tributaries: Walker Creek Lagunitas Creek Olema Creek	Fecal coliform	Log mean <200 <sup>a</sup> 90th percentile < 400 <sup>b</sup>
<sup>a</sup> . Based on a minimum of five consecutive samples equally spaced over a 30-day period. <sup>b</sup> . No more than 10% of total samples during any 30-day period may exceed this number.
