

Table 7.8.4-4b Required TMDL Implementation Measures for Sediment Discharges Associated with Grazing¹

Land Use Category	Performance Standards	Actions	Implementing Parties	Completion Dates
Grazing	<p>Surface erosion associated with livestock grazing: Attain or exceed minimal residual dry matter values consistent with University of California Division of Agriculture and Natural Resources Guidelines⁴; and</p> <p>Roads: Road-related sediment delivery to channels ≤ 500 cubic yards per mile per 20-year period; and</p>	<p>Submit a Report of Waste Discharge² to the Water Board that provides, at a minimum, the following: description of the property; identification of site-specific erosion control measures to achieve performance standard(s) specified in this table; and a schedule for implementation of identified erosion control measures.</p>	<p>Landowner and/or ranch operator</p>	<p>October 2014</p>
	<p>Gullies and/or shallow landslides: Accelerate natural recovery and prevent human-caused increases in sediment delivery from unstable areas.</p>	<p>Comply with applicable waste discharge requirements (WDRs) or waiver of WDRs.</p>	<p>Landowner and/or ranch operator</p>	<p>As specified in applicable WDRs or waiver of WDRs</p>
		<p>Report progress on implementation of site specific erosion control measures.³</p>	<p>Landowner and/or ranch operator</p>	<p>As specified in applicable WDRs or waiver of WDRs</p>
<p>¹ To achieve TMDL allocations and consistent with the Policy for Implementation and Enforcement of the Nonpoint Source Pollution Control Program (State Board, 2004).</p> <p>² Or compliance with applicable conditional waivers of WDRs that may be adopted by the Water Board.</p> <p>³ These reports may be prepared individually or jointly or through a recognized third party.</p> <p>⁴ University of California 2002, California guidelines for residual dry matter (RDM) management on coastal and foothill annual rangelands. Rangeland Monitoring Series Publication 8092.</p>
