---

[1] Disadvantaged Community (DAC) is defined as "a community with a median household income (MHI) less than 80% of the State-wide average. Census defined areas which have MHIs that are less than 60% of the State-wide MHI average are considered "severely DACs"; This list was developed using US Census American Community Survey (ACS) Data: 2013 – 2017; Entities applying for funding are encouraged to verify that their proposed project will benefit the specific census defined area (Census Place, Tract, or Block Group) per the latest US Census ACS data, Integrated Regional Water Management funding area information, and per the specific guidelines for the funding source in which they are applying.
