Beverly Hills, CA 90210

**FACILITY MAILING ADDRESS**

9601 Wilshire Boulevard, Suite 220  
Beverly Hills, CA 90210

**PROJECT DESCRIPTION:**

The proposes to discharge groundwater from a recently constructed water well, Anoakia Well, during a short term aquifer pumping test. The discharge is necessary to collect information requested by the California Department of Health Services in order to verify that the groundwater meets drinking water standards.

**VOLUME AND DESCRIPTION OF DISCHARGE:**

Up to 18,000 gallons per day of groundwater will be discharged. The proposed discharge will be initiated during the month of January 2002 and will last up to days. The groundwater will be discharged into a storm drain along the Roxford Channel (Latitude: , Longitude: ). Discharge to the storm drain flows into Benedict Canyon Channel and Ballona Creek, waters of the United States. The site location map is shown in Figure 1.

**FREQUENCY OF DISCHARGE:**

The discharge will last for approximately 72 hours, and will be conducted in January 2002.

**REUSE OF WATER:**

Water reuse alternatives and its applicability at the site were evaluated. A small volume of groundwater will be used for on-site or commercial purposes. The majority of the groundwater will be discharged into the storm drain.
