**TERMINATION OF COVERAGE UNDER GENERAL WASTE DISCHARGE REQUIREMENTS
76 SERVICE STATION NO. 4454
7751 BEVERLY BOULEVARD, LOS ANGELES, (CASE NO. 900360198)
ORDER NO. R4-2005-0030, SERIES NO. 008, CI-8922**

Dear Ms. London:

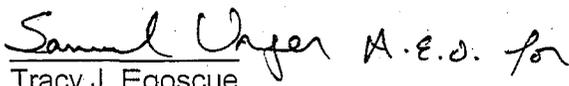

Our letter dated July 13, 2005, informed you that the subject discharge is regulated under Order No. R4-2005-0030, Series No. 008, and that the Order also served as your Waste Discharge Requirements (WDR).

In a letter dated June 12, 2009, ConocoPhillips notified the Regional Board that the injection of ozone for the remediation of petroleum hydrocarbons and oxygenates at the site was being changed to oxygen amended air beginning June 30, 2009. The letter is also requesting the rescission of the WDR.

A comparison of pre- and post-ozone injection groundwater data indicated that dissolved phase petroleum hydrocarbon concentrations continue to be detected. Since the injection of oxygen amended air does not require a WDR, the WDR is no longer needed and the coverage under Order No. R4-2005-0030, Series No. 008 for the subject site is hereby terminated effective June 30, 2009.

If you have any questions, please contact the Project Manager, Mr. Daniel P. Piroton, at (213) 576-6714 or the Chief of the Groundwater Permitting Unit, Dr. Rebecca Chou, at (213) 620-6156.

Sincerely,

Tracy J. Egoscue
Executive Officer

California Environmental Protection Agency

Our mission is to preserve and enhance the quality of California's water resources for the benefit of present and future generations.
