RETURN RECEIPT REQUESTED
CLAIM NO. 7002 2410 0005 0647 5726

Dear Mr. Kim:

GENERAL WASTE DISCHARGE REQUIREMENTS FOR SMALL COMMERCIAL AND MULTIFAMILY RESIDENTIAL SUBSURFACE SEWAGE DISPOSAL SYSTEMS – THE PROPERTY OF COUNTY OF LOS ANGELES PROPOSED ACTON/AGUA DULCE LIBRARY, 33792 CROWN VALLEY ROAD, ACTON, CALIFORNIA, (FILE NO. 07- 062, CI NO. 9287)

We have completed our review of your application for Waste Discharge Requirements for wastewater generated from an onsite septic disposal system at the above address.

Reference is made to your submittal of a permit application regarding the property located at 33742 Crown Valley Road in Acton. The proposed plan for the property is to build a public library. The average volume of discharge from the septic system is estimated at 2,750 gallons per day (gpd) and a peak flow of 5,500 gpd. You proposed to install two microseptec enviroserver ES-25 treatment systems capable of treating 13,750 gpd. Effluent will drain from the treatment system into a seepage pit. A geological report included in your application for the property indicates depth to groundwater at approximately 55 feet.

Regional Board staff has reviewed the information provided and have determined that the proposed discharge meets conditions specified in Regional Board Order No. 01-031, "*General Waste Discharge Requirements for Small Commercial and Multifamily Residential Subsurface Sewage Disposal Systems*," adopted on February 22, 2001.

Enclosed are your Waste Discharge Requirements, consisting of Order No. 01-031, Monitoring and Reporting Program No. CI-9287 and Standard Provisions Applicable to Waste Discharge Requirements. Please note that the discharge limits in Attachment A of Order No. 01-031 are applicable to your discharge. Should changes to the septic disposal system be needed, revised engineering drawings showing the change must be filed with the Regional Board a minimum of thirty days prior to the change. The Discharger must receive approval of such change.

The Monitoring and Reporting Program requires you to implement the monitoring program on the effective date of coverage under this permit. All monitoring reports should be sent to the Regional Board, ATTN: Information Technology Unit. Please note that the Regional Board Executive Officer may require you to develop and implement a groundwater-monitoring program based on the results of the technical information pertaining to your septic disposal system.

When submitting monitoring or technical reports to the Regional Board per these requirements, please include a reference to "Compliance File No. CI-9277", which will assure that the reports are directed to the appropriate file and staff. Also, please do not combine other reports with your monitoring reports. Submit each type of report as a separate document.

If you have any additional questions, please contact Rodney Nelson at (213) 620-6119 or Doug Cross at (213) 620-2246.

Sincerely,

Deborah J. Smith
Interim Executive Officer
