**SUBJECT: CORRECTION TO LETTER FOR ENROLLMENT UNDER GENERAL WASTE DISCHARGE REQUIREMENTS (ORDER NO. R4-2007-0019), PROPOSED IN-SITU CHEMICAL OXIDATION USING OXYGEN RELEASE COMPOUND**

**SITE: FORMER CLARIANT OIL SERVICES, 801 W. 14<sup>TH</sup> STREET, LONG BEACH, CA (SCP NO. 0988, SITE ID NO. 204EB00, WDR FILE NO. 10-168, CI-9664)**

Dear Mr. Grier:

On February 9, 2011, the California Regional Water Quality Control Board, Los Angeles Region (Regional Board) issued a letter (copy enclosed) to approve your application for coverage under the General Waste Discharge Requirements (WDR) to use a Oxygen Release Compound product for the in-situ chemical oxidation to remediate total petroleum hydrocarbon and volatile organic compounds impact to the subsurface at the above referenced site. Regional Board staff has found three minor errors in the letter issued on February 9, 2011, which should be corrected as follow:

1. In the WDR enrollment confirmation letter dated February 9, 2011, there is reference to CI-9664 in the subject line, however on page 2 in both paragraphs 3 and 4 there is a reference to CI-9543. The correct reference is to CI-9664 as shown in the subject line of the letter, therefore the reference to CI-9543 is incorrect and should be corrected to read CI-9664.
2. In this letter on page 3 under enclosures there is a reference to CI No. 9556, this reference is incorrect and should be corrected to read CI-9664.

**If you have any questions, please contact me at (213) 576-6740 or [rehe@waterboards.ca.gov](mailto:rehe@waterboards.ca.gov).**

Sincerely,

Robert Ehe, PE  
Site Cleanup Unit IV

Enclosure: Copy of letter dated February 9, 2011
