**NOTICE OF PUBLIC HEARING
PROPOSED REISSUANCE
OF
WASTE DISCHARGE REQUIREMENTS
(National Pollutant Discharge Elimination System Permit)**

DISCHARGER	DISCHARGE LOCATION	RECEIVING WATER
City of Simi Valley (Simi Valley Water Quality Control Plant)	600 West Los Angeles Avenue Simi Valley, California	Arroyo Simi thence to Calleguas Creek

City of Simi Valley (City or Discharger) owns and operates a publicly-owned treatment works (POTW) comprised of Simi Valley Water Quality Control Plant (Simi Valley WQCP or Facility) including its associated wastewater collection system and outfalls.

The facility discharges wastewater to the Arroyo Simi, a water of the United States. The Discharger was previously regulated by Order R4-2014-0066 and NPDES Permit No. CA0055221 adopted on May 8, 2014. This Order was amended on July 19, 2015 by Order R4-2014-0066-A01 and expired on June 30, 2019. The terms and conditions of the current Order have been administratively continued and remain in effect until new Waste Discharge Requirements and NPDES permit are adopted pursuant to this Order.

The Discharger submitted Report of Waste Discharge dated December 3, 2018, and applied for an NPDES permit renewal to discharge up to 12.5 million gallons per day of tertiary-treated wastewater from the Facility. The application was deemed complete on January 22, 2019.

The treatment consists of primary sedimentation, activated sludge biological treatment with nitrification and denitrification (NDN), secondary sedimentation, dual media filtration, chlorination, and dechlorination. Treated wastewater discharged to Arroyo Simi is dechlorinated but the effluent delivered for reuse is not dechlorinated.

Simi Valley WQCP serves an estimated population of 126,878 people, and receives wastewater from the City of Simi Valley and unincorporated sections of Ventura. The wastewater is a mixture of domestic and industrial wastewater that is pre-treated pursuant to 40 CFR part 403.

On the basis of preliminary staff review and application of lawful standards and regulations, the California Regional Water Quality Control Board, Los Angeles Region,

tentatively proposes to issue waste discharge requirements, including effluent limitations and special conditions.
