**NOTICE OF TERMINATION FOR GENERAL ORDER NO. R5-2008-0149,  
OXYCHEM-STOCKTON, 1904 CHARTER WAY, SAN JOAQUIN COUNTY**

On 11 April 2011, the Executive Officer of the Regional Water Quality Control Board, Central Valley Region (Central Valley Water Board) issued a Notice of Applicability under Order No. R5-2008-0149, *In-Situ Groundwater Remediation at Sites with Volatile Organic Compounds, Nitrogen Compounds, Perchlorate, Pesticides, Semi-Volatile Compounds, Hexavalent Chromium and/or Petroleum Hydrocarbons* to Glenn Springs Holding Company for its Oxychem Stockton facility. In the Notice of Applicability, the project was assigned site-specific Order No. R5-2008-0149-027. Remediation conducted under this project began with injection of HRC® Primer and 3DME between 18 April and 27 April 2011. Post injection monitoring was conducted through the third quarter 2012. In a 30 January 2013 letter, your consultant, Mr. Matthew Sutton of The Source Group, requested termination of enrollment in the Order stating that no further injections are planned.

Central Valley Water Board staff reviewed the remediation data provided in the *2012 Annual Groundwater and Enhanced In-Situ Bioremediation Monitoring and Sampling Report* dated 22 January 2013, prepared by The Source Group. The data show that the biological activity induced by the injections have subsided and most geochemical parameters have returned to background conditions. The remaining geochemical parameters are trending downward and are expected to meet background concentrations by June 2013. Therefore, Central Valley Water Board staff concur that Glenn Springs Holding Company's enrollment may be terminated.

General Order No. R5-2008-0149-027 is hereby terminated as of the date of this letter. If you have any questions, please contact Ms. Amy Terrell by telephone at (916) 464-4680, or by email at [Amy.Terrell@waterboards.ca.gov](mailto:Amy.Terrell@waterboards.ca.gov).
