

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD  
CENTRAL VALLEY REGION

ORDER R5-2016-0080

The California Regional Water Quality Control Board, Central Valley Region (Central Valley Water Board), finds that the Central Valley Water Board adopted the following Orders which are no longer applicable for the reasons shown:

**a. Gold Ridge Estates III, Plumas County (Facility)**

Waste Discharge Requirements Order 93-003, adopted on 29 January 1993, prescribes requirements for the discharge from Gold Ridge Estates III, Plumas County (Facility). The Facility is comprised of a wastewater collection system with septic tanks, and leachfields. The Facility is now regulated under Water Quality Order 2014-0153-DWQ (General Order) for discharges to land from small domestic systems with a maximum average daily flow of 100,000 gallons or less. Therefore, it is appropriate to rescind Waste Discharge Requirements Order 93-003.

**b. Juneja International LLC, Firebaugh Truck and Auto Plaza in section 28 and 29 of Township 21 South, Range 14 East, MDB&M in Merced County.**

Waste Discharge Requirements Order 89-034, adopted on 24 February 1989, prescribes requirements for the discharge of a package treatment system for Juneja International LLC, Firebaugh Truck and Auto Plaza in section 28 and 29 of Township 21 South, Range 14 East, MDB&M in Merced County. The Discharger has removed the old treatment system and installed a new treatment system. Merced County Department of Public Health will act as the Local Agency Management Program under the State Water Board Onsite Wastewater Treatment System Policy. Therefore, it is appropriate to rescind Waste Discharge Requirements Order 89-034.

**c. Millstream Mobile Home Park, Tehama County (Facility)**

Waste Discharge Requirements Order 90-010, adopted on 26 January 1990, prescribes requirements for the discharge from the Millstream Mobile Home Park, Tehama County (Facility). The Facility is comprised of a septic tank and leach field disposal system. The Facility is now regulated under Water Quality Order 2014-0153-DWQ (General Order) for discharges to land from small domestic systems with a maximum average daily flow of 100,000 gallons or less. Therefore, it is appropriate to rescind Waste Discharge Requirements Order 90-010.

**d. Placer County Department of Facility Services, Placer County Sewer Maintenance District 1 Wastewater Treatment Plant, Placer County**

Placer County Department of Facility Services (Discharger) is the owner and operator of Placer County Sewer Maintenance District 1 Wastewater Treatment Plant (Facility) in Placer County, which was permitted to discharge tertiary treated wastewater to Rock Creek. In September 2010, the Central Valley Regional Water Board adopted Waste Discharge Requirements (WDR) Order R5-2010-0092 that included final effluent limitations for the discharge to Rock Creek, tributary to Dry Creek, the Bear River, and the Sacramento River. Cease and Desist Order (CDO) R5-2010-0093 was adopted in conjunction with the WDR. The Discharger chose to comply with WDR effluent limitations by connecting to the City of Lincoln's Wastewater Treatment Plant (WWTP) and decommissioning the Facility. The CDO was amended in May 2013, requiring a new schedule for intermediate tasks but maintaining the final effluent limitations compliance date of 1 September 2015.

In late 2014, additional time was necessary to complete construction of the pipeline to Lincoln's WWTP. In April 2015, the WDR Order was amended (Order R5-2010-0092-01)

to remove interim effluent limitations and compliance schedules and Time Schedule Order (TSO) R5-2015-0034 was adopted to require completion of construction by 1 December 2015 and rescind CDO R5-2010-0093-01. Due to failed pipeline connections, more time was needed and the TSO was amended in December 2015 (R5-2015-0034-01), to allow for completion of the project by 1 October 2016. Repairs to the pipeline were completed and on 23 May 2016 discharge to Rock Creek ceased. All wastewater formerly treated at the Facility is transferred and treated by the City of Lincoln's WWTP. Decommissioning of the Facility is to be completed by 1 October 2016. The Facility no longer discharges nor has the ability to discharge to Rock Creek, and therefore, it is appropriate to rescind the WDR and TSO.

A Notice of Public Hearing was sent to the discharger and interested parties on 10 August 2016 for a 30-day public comment period closing on 9 September 2016. No comments were received.

**e. Rancheria RV Park, Shasta County (Facility).**

Waste Discharge Requirements Order 93-004, adopted on 29 January 1993, and prescribes requirements for the discharge from Rancheria RV Park, Shasta County (Facility). The Facility is comprised of a wastewater collection system with septic tanks, lift station, dosing tank and leachfield. The Facility is now regulated under Water Quality Order 2014-0153-DWQ (General Order) for discharges to land from small domestic systems with a maximum average daily flow of 100,000 gallons or less. Therefore, it is appropriate to rescind Waste Discharge Requirements Order 93-004.

**f. Walker Ranch/Bailey Creek WWTF, Plumas County (Facility)**

Waste Discharge Requirements Order 96-264, adopted on 25 October 1996, and prescribes requirements for the discharge from Walker Ranch/Bailey Creek WWTF, Plumas County (Facility). The Facility is comprised of a wastewater collection system with septic tanks, a dosing tank, recirculating sand filter and leachfields. The Facility is now regulated under Water Quality Order 2014-0153-DWQ (General Order) for discharges to land from small domestic systems with a maximum average daily flow of 100,000 gallons or less. Therefore, it is appropriate to rescind Waste Discharge Requirements Order 96-264.

IT IS HEREBY ORDERED that the above Orders are rescinded.

I, PAMELA C. CREEDON, Executive Officer, do hereby certify the foregoing is a full, true, and correct copy of an Order adopted by the California Regional Water Quality Control Board, Central Valley Region on October 14, 2016
