**AMENDED NOTICE OF APPLICABILITY R5-2018-0085-0035; WAIVER OF REPORTS OF WASTE DISCHARGE AND WASTE DISCHARGE REQUIREMENTS FOR SPECIFIC TYPES OF DISCHARGE WITHIN THE CENTRAL VALLEY REGION; ASSEMI GROUP, INC.; USE OF RECYCLED WATER FOR CONSTRUCTION PURPOSES; FRESNO COUNTY**

On 19 December 2019, the Central Valley Regional Water Quality Control Board (Central Valley Water Board) issued the Assemi Group, Inc. (Discharger), a Notice of Applicability for use of recycled water for construction purposes under Resolution R5-2018-0085, *Approving Waiver of Reports of Waste Discharge and Waste Discharge Requirements for Specific Types of Discharge Within the Central Valley Region* (Low Threat Waiver). The Discharger was assigned enrollee number R5-2018-0085-0035 for the use of disinfected tertiary recycled water from Fresno County Service Area (CSA) #34, Millerton New Town Wastewater Treatment Facility (WWTF) for construction purposes including dust suppression and soil compaction within designated areas in Tracts 4968 and 4934, including the Morningside Way and Marina Drive extensions.

This letter responds to your 14 July 2021 request to amend the existing Notice of Applicability (NOA) to expand the use of recycled water for construction purposes to additional areas owned and/or controlled by the Assemi Group within the Millerton New Town Specific Plan Area as shown in Attachment A. According to the submittal, the application and use of recycled water will be consistent with the existing NOA R5-2018-0085-0035 and the June 2019 Title 22 Engineering Report approved by the State Water Resources Control Board, Division of Drinking Water (DDW). On 12 July 2021, DDW confirmed that they have no issues with the expansion as proposed provided no changes are made to the June 2019 Title 22 Engineering Report.

---

KARL E. LONGLEY ScD, P.E., CHAIR | PATRICK PULUPA, ESQ., EXECUTIVE OFFICER

1685 E Street, Fresno, CA 93706 | [www.waterboards.ca.gov/centralvalley](http://www.waterboards.ca.gov/centralvalley)

We have no objection to the proposed expansion of recycled water for construction purposes as described in the 14 July 2021 request, provided the Discharger complies with the terms and conditions including all monitoring and reporting requirements stipulated in the existing NOA R5-2018-0085-0035 and the June 2019 Title 22 Engineering Report. Therefore, NOA R5-2018-0085-0035 is hereby amended to include the additional areas proposed in your 14 July 2021 request and identified in Attachment A.

If you have any questions regarding this amendment, please contact Katie Carpenter at [katie.carpenter@waterboards.ca.gov](mailto:katie.carpenter@waterboards.ca.gov).
