NOTICE OF APPLICABILITY

WAIVER OF WASTE DISCHARGE REQUIREMENTS FOR SMALL FOOD PROCESSORS, WINERIES, AND RELATED AGRICULTURAL PROCESSORS WITHIN THE CENTRAL VALLEY REGION

ORDER R5-2015-0005-0094 LAMANUZZI & PANTALEO, LLC, FRESNO COUNTY

On 5 February 2015, the Central Valley Regional Water Quality Control Board (Central Valley Water Board) adopted the *Conditional Waiver of Waste Discharge Requirements for Small Food Processors, Wineries, and Related Agricultural Processors within the Central Valley Region*, Order R5-2015-0005 (the Waiver).

We are in receipt of your Report of Waste Discharge (RWD) dated 28 July 2017, which states that you intend to comply with the Tier 3 conditions of the Waiver. Tier 3 allows land application of up to 1,000,000 gallons of process wastewater per year for irrigation of landscaping or crops and land application of residual solids associated with that volume of wastewater with a minimum of 1.0 acres of land application area per 100,000 gallons of wastewater. Any process wastewater or residual solids in excess of those amounts must be disposed of off-site at an appropriately permitted facility.

Based on the information provided in the RWD, we have determined that the discharge meets the required conditions for approval under the Waiver. You are hereby assigned Order R5-2015-0005-0094. A copy of the Waiver is enclosed and also available at:

https://www.waterboards.ca.gov/centralvalley/board_decisions/adopted_orders/#waivers

Please familiarize yourself with the contents of the Waiver, including the Conditions of Discharge (Waiver Attachment A) and Monitoring and Reporting Program (Waiver Attachment B). The discharge must be managed in accordance with the requirements contained in the Conditions of Discharge and with the information submitted in the RWD.

DISCHARGE DESCRIPTION

The Lamanuzzi & Pantaleo Plant No.1 is a small grape dehydrating plant at 3636 North Grantland Avenue in Fresno County.

The dehydrating plant was previously regulated under Waste Discharge Requirements Order 94-350. According to the RWD the dehydrating plant is currently not in operation and not been in operation since 2014. The Discharger anticipates to run the plant only during extreme weather conditions. The dehydrating plant will generate about 500,000 gallons of wastewater annually and discharge the wastewater to five acres where forage grass will be grown. The discharge will primarily take place August to December. This Notice of Applicability limits the discharge from the Lamanuzzi & Pantaleo Plant No. 1 up to a total of 500,000 gallons of wastewater per year to the five acres.

Residual solids produced at the winery include grape stems, seeds, and skins. Approximately 0.08 tons of residual solids are produced annually. The residual solids are hauled off-site to a feed lot.

Waste Discharge Requirements Order 94-350 is proposed to be rescinded at the 5/6 April 2018 Central Valley Water Board. Upon rescission of Order 94-350, coverage for your facility under the Waiver shall become effective subject to this Notice of Applicability.

MONITORING AND REPORTING

Attachment B of the Waiver includes specific monitoring and reporting requirements that you must comply with, including routine monitoring and reporting to the Central Valley Water Board. Please review the Monitoring and Reporting Program closely and establish the appropriate record keeping system so that you are able to complete the required Annual Monitoring Report Form, which is also contained in Attachment B of the Waiver.

By **1 February of each year**, the Annual Monitoring Report must be submitted to our office, even if there is no discharge during the reporting year. The 2018 Annual Monitoring Report is due by 1 February 2019.

GENERAL INFORMATION AND REQUIREMENTS

The Waiver includes specific and general conditions with which you must comply and you must maintain control over the discharge and operate in accordance with the information provided in your RWD and this Notice of Applicability.

Please review this Notice of Applicability carefully to ensure that it completely and accurately reflects the facility name, location, and details of the proposed discharge. Failure to comply with the requirements of the Waiver may result in enforcement action as authorized by provision of the California Water Code, which could include civil liability. Discharge of wastes not described in the Conditions of Discharge (Attachment A) of this Waiver is prohibited.

Please note that the Waiver will expire on **5 February 2020**, after which you must do one of the following:

1. Submit a new RWD with a filing fee (if required) to obtain coverage under a subsequently adopted waiver,

2. Submit a RWD with a filling fee to apply for individual or general Waste Discharge Requirements, or
3. Cease the discharge.

DOCUMENT SUBMITTALS

All monitoring reports and other correspondence should be converted to searchable Portable Document Format (PDF) and submitted electronically. Documents that are less than 50 MB should be emailed to:

centralvalleyfresno@waterboards.ca.gov.

To ensure that your submittal is routed to the appropriate staff person, the following information should be included in the body of the email or any documentation submitted to the mailing address for this office:

Facility Name: Lamanuzzi & Pantaleo Plant No. 1		
Program: Non-15	Order: R5-2015-0005-0094	CIWQS Place ID: 248646

Documents that are 50 MB or larger should be transferred to a CD, DVD, or flash drive and mailed to:

Central Valley Regional Water Quality Control Board
Fresno Office
1685 E Street
Fresno, CA 93706

If you have any questions regarding this matter, please contact Denise Soria at (559) 444-2488 or by email at dsoria@waterboards.ca.gov.
