

LATE REVISIONS – 7/8 December 2017

Late Revisions No. 2

Published 5 December 2017

Item 8 Valley Water Management Company, Race Track Hill Facility and Fee 34 Facility, Edison Oil Field, Kern County – Consideration of an Order Amending Water Code Section 13301 (Cease and Desist Order) Order No. R5-2015-0093.

Specific changes are underlined for additions and strikeout for deletions.

Order Amending Water Code Section 13301 (Cease and Desist Order) Order No. R5-2015-0093

Page 2 Revise Finding 8 as follows:

8. The discharge of produced wastewater to the Race Track Hill facility has occurred since 1958. The requested time extension to allow for a greatly reduced discharge volume of produced wastewater while Edison Beneficial Reuse implements alternative disposal methods will have significantly less impact on groundwater than historic activities at that site. To ensure that the discharge of produced wastewater to the Race Track Hill facility remains significantly reduced, this Order includes a monthly average daily flow limit of 2,500 barrels. This flow limit considers historical flows to the Race Track Hill facility and a buffer for fluctuations that may occur during petroleum production over the next 18 months.
