

**15 October 2021 BOARD MEETING
DISCUSSION AGENDA ITEM**

AGENDA ITEM: 13

SUBJECT:

DRAFT GENERAL ORDER, MID-SIZED MUNICIPAL WASTEWATER TREATMENT PLANTS

BOARD ACTION:

Information Item Only

BACKGROUND:

The Central Valley Region has about 120 mid-sized municipal wastewater treatment plants, with design flows from 100,000 to 1,000,000 gallons per day. Most are under Individual Waste Discharge Requirements that are overdue for renewal. Most are pond systems, sufficiently similar in operation, waste type, and minimum treatment standards to warrant a General Order pursuant to California Water Code §13263(i). Staff is working on a draft general order for public comment and future consideration of adoption by the Board.

RECOMMENDATION:

Not applicable. Informational item only.

REVIEWS:

Management Review:	BJS, 9/24/2021
Legal Review:	N/A

BOARD MEETING LOCATION:

Central Valley Regional Water Quality Control Board meeting
364 Knollcrest Drive, Suite 205
Redding, CA 96002
