APPROVAL OF KINGS RIVER WATER QUALITY COALITION'S REVISED SOURCE IDENTIFICATION STUDY WORKPLAN FOR MOLYBDENUM AND NICKEL

Thank you for your 3 February 2025 submittal of the revised proposed Source Identification Study Workplan (SIS Workplan) for the Kings River Water Quality Coalition (Coalition). Based on Central Valley Water Board staff's review, the SIS Workplan contains the required elements described in the Monitoring and Reporting Program for Waste Discharge Requirements General Order R5-2013-0120-09.

The SIS Workplan is approved. By **12 August 2025**, please submit a report summarizing the findings of the Source Identification Study described by the SIS Workplan.

Should the Coalition collect sufficient evidence indicating that irrigated agriculture is not causing or contributing to the observed water quality issues, or they are unlikely to be remedied or addressed by a Surface Water Quality Management Plan, it may request the Executive Officer to determine that development of a management plan is not required.

If you have any further questions regarding this letter, please contact Mathew Jian by phone at (559) 445-5567, or by email at Mathew.Jian@waterboards.ca.gov.
