
Central Valley Regional Water Quality Control Board

This document consists of a table that was generated by the California Central Valley Regional Water Quality Control Board (Central Valley Water Board) on 11 February 2021. The table identifies produced wastewater disposal ponds in Region 5 of the Central Valley Water Board. The table consists of eight columns that outline the following information, in the order listed in the table:

1. Operator name;
2. Lease name;
3. Oil Field name;
4. GeoTracker Global ID;
5. Number of ponds;
6. Status of the pond;
7. Latitude (provided in decimal degrees); and
8. Longitude (provided in decimal degrees).

Column 6 identifies the status of the pond. Under this column are five potential options that are defined below:

- Active - The facility is active and the pond is or has the potential to be used for the disposal or discharge of produced water.
- Inactive - One of the following conditions applies to the pond: currently used as emergency containment or the Operator is in the process of preparing a closure plan. In either situation, the pond is not being used for the disposal of produced water.
- Closing - The Operator has submitted a closure plan or stated their intent to close the pond.
- Closed NFA – Central Valley Water Board staff has approved the closure of the pond and no further action is needed by the Operator.
- Closed PC WDRs – Central Valley Water Board staff has approved the closure of the pond and adopted Post-Closure WDRs that require ongoing monitoring of the closed facility.

If you have any questions regarding this document, please contact Joshua Mahoney at (559) 444 – 2449 or via email at Joshua.Mahoney@waterboards.ca.gov.
