

---

*Dear Ms. Grover:*

*It is very distressing that the Responsible Parties did not meet their deadline of June 2017 for TMDL reductions. To suggest that there be a delay of 10 – 20 years is ludicrous since the Lake is becoming more and more toxic from the amount of phosphorus being added. To allow this to continue shows a level of apathy and irresponsibility that makes anyone question the qualifications, as well as the priorities, of those making the decisions.*

*Our lake is unique and vital to our county for tourism and overall quality of life. We must protect it for ourselves (property values) and future generations. Vineyards can grow almost anywhere, but should not be allowed to destroy our beautiful lake. Please help us in this effort. Thank you.*

*Marybeth Alteneider*
