Dear Ms. Grover,

A delay in compliance for the Clearlake Nutrient TMDL will only contribute to Lake County's economic woes. Not only do the people who live here want to safely enjoy the lake, but it is also unfit for the tourism that we depend upon for our economic development and sustainability.

There is no time like the present to address Clearlake's issues. It is imperative to the county's health and well being, and to a healthy ecology as well.

Thank you!
