The California Regional Water Quality Control Board, San Diego Region (San Diego Water Board) is considering adoption of changes to the Clean Water Act (CWA) Section 303(d) list of impaired waterbodies, and CWA Section 305(b) Integrated Report on the water quality of waterbodies within the San Diego Region. Clean Water Act Section 305(b) requires each state to report biennially to the United States Environmental Protection Agency (U.S. EPA) on the quality of its waters. CWA Section 303(d) requires each State to develop, update, and submit biennially to the U.S. EPA a list of waterbodies or segments that are "impaired or threatened" which either do not meet, or not expected to meet, water quality standards before the next listing cycle. In addition, waterbodies on the 303(d) list can be delisted when evidence establishes that the impairment(s) does not exist and the waterbody is meeting water quality standards, or that the impairment listing is flawed. Impaired waterbodies or segments on the 303(d) list must be addressed through the development of TMDLs or by other means as described in the State's Water Quality Control Policy for Addressing Impaired Waters. Upon adoption, the Integrated Report will be submitted to the State Water Resources Control Board. These changes are not subject to the California Environmental Quality Act (CEQA).
