Dear Mr. Chapman:

**Subject: Requirement to Enroll Under Industrial Storm Water General Permit, Tayman Industries, Inc.**

Pursuant to California Water Code (CWC) Section 13399.30, you are hereby notified that Tayman Industries, Inc. is required to enroll under Order No. 97-03-DWQ, National Pollutant Discharge Elimination System (NPDES) General Permit No. CAS000001, *Waste Discharge Requirements (WDRs) For Discharges of Storm Water Associated with Industrial Activities Excluding Construction Activities*. Order No. 97-03-DWQ (Industrial Storm Water General Permit) was issued by the State Water Resources Control Board on April 17, 1997 and is enforced locally by the California Regional Water Quality Control Board, San Diego Region (San Diego Water Board). Our records indicate that coverage under the Industrial Storm Water General Permit for your facility located at 5692 Eastgate Drive in San Diego is mandatory (SIC 4212). On June 23, 2011, a San Diego Water Board inspector and a City of San Diego Storm Water inspector visited your facility and confirmed that coverage is required.

The Industrial Storm Water General Permit is an NPDES permit that regulates discharges associated with 10 broad categories of industrial activities. This permit requires the implementation of management measures that will achieve the performance standard of best available technology economically achievable (BAT) and best conventional pollutant control technology (BCT). The Industrial Storm Water General Permit also requires the development of a Storm Water Pollution Prevention Plan (SWPPP) and a water quality monitoring plan. Through the SWPPP, sources of pollutants are to be identified and the means to manage the sources to reduce storm water pollution are described. The permit requires that an annual report be submitted each July 1.

For more information regarding the Industrial Storm Water General Permit, please see our website:
