- What is one thing you plan to do before the summer ends?

# Discussion Session #1:

FY 2022-23 Safe and Affordable Drinking Water Fund Expenditure Plan

# Fiscal Year 2021-22 Progress

# **FY 2021-22 SAFER Program Performance**

|                                    | Water Systems<br>(Communities/<br>Schools) | Households | No. of<br>Connections<br>Benefiting | No. of People<br>Benefiting | Total<br>Assistance<br>Provided |
|------------------------------------|--|------------|-------------------------------------|-----------------------------|---------------------------------|
| Interim Assistance                 | 55   | 1,265      | 6,451                               | 35,244                      | \$13 M                          |
| Technical Assistance (TA) Projects | 94 <sup>1</sup>                            |            | 35,515                              | 128,283                     | \$14.6 M                        |
| Planning Projects                  | 10   |            | 117,996                             | 335,877                     | \$4.5 M                         |
| Construction Projects <sup>2</sup> | 37<br>(26)                                 | )          | 1M<br>(32,051)                      | 7.3M<br>(56,293)            | \$691 M<br>(\$97 M)             |

<sup>&</sup>lt;sup>1</sup> 94 TA projects also includes 27 projects for planning via TA

<sup>&</sup>lt;sup>2</sup> Numbers in parentheses for construction projects reflect projects in Office of Sustainable Water Solutions (OSWS) benefitting primarily small DACs or low-income households. The work in other categories is solely through OSWS and benefitting primarily small DACs or low-income households.

# FY 2021-22 SAFER Program Performance, cont.

| Item  | Number |
|---|--------|
| Systems returned to compliance (7/1/2020 – 6/30/2022)           | 92     |
| Active Consolidation Projects as of 6/30/22                     | 207    |
| Mandatory Consolidation Projects Initiated                      | 2      |
| Mandatory Orders Issued   | 1      |
| Executed Consolidation Funding Agreements                       | 19     |
| Administrators Completed  | 0      |
| New Water Systems Designated                                    | 14     |
| Executed Funding Agreements/Work Plans                          | 2      |
| Executed O&M Funding Agreements for Systems with Administrators | 0      |
| Orders Executed   | 1      |
|   |        |

## **SAFER Program Assistance by System Type**

| System Type                       | Total<br>Number of<br>Systems | Systems Receiving Assistance [%] (# Approved/# Requested) | Total Funding Provided/Pending (\$ Approved/\$ Requested) |
|-----------------------------------|-------------------------------|---|---|
| Systems Out of Compliance (HR2W)* | 368                           | <b>220 [60%]</b> (200/ 20)                                | <b>\$337.5 M</b><br>(\$205.4 M/ \$132.1 M)                |
| At-Risk Systems                   | 432                           | <b>128 [30%]</b> (108/ 20)                                | <b>\$226.5 M</b><br>(\$163.6 M/ \$62.9 M)                 |

<sup>\*</sup> Number of systems on the Human Right to Water (HR2W) list used in the 2022 Drinking Water Needs Assessment (from April 2022)

#### **FY 2021-22 SAFER Program Committed Expenditures**

(SADW Fund plus other complementary funding)

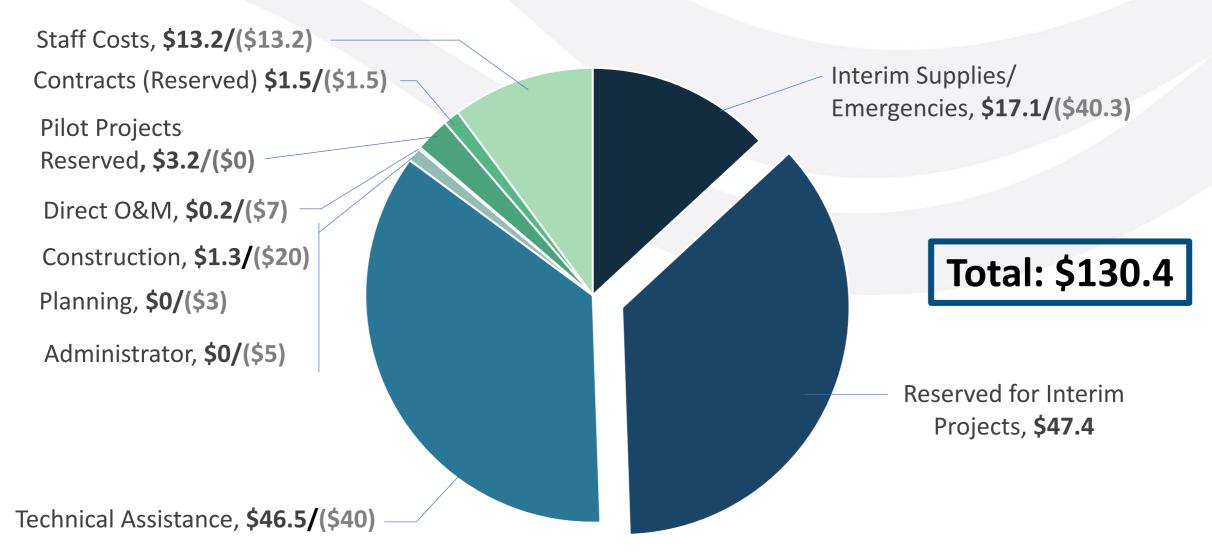

| Funding Category                            | Interim Water<br>Supplies and<br>Emergencies | Technical<br>Assistance <sup>1</sup> | Administrator/<br>O&M | Planning/<br>Construction | TOTAL                           |
|---|--|--------------------------------------|-----------------------|---------------------------|---------------------------------|
| Safe, Affordable Drinking Water (SADW) Fund | \$18 M                                       | \$51.8 M                             | \$0.2 M               | \$5.3 M                   | \$75.3 M                        |
| General Obligation<br>Bond Funding          | 1  | \$1.9 M                              | -                     | \$15.8 M                  | \$17.7 M                        |
| General Fund (GF)                           | \$10.9 M                                     | \$3.6 M                              | \$6.1 M               | \$120.3 M                 | \$140.9 M                       |
| Principal Forgiveness                       |  | -                                    | -                     | \$55 M                    | \$55 M                          |
| TOTAL                                       | \$28.9 M                                     | \$57.3 M                             | \$6.3 M               | \$196.4 M                 | \$288.9 M<br>(100) <sup>2</sup> |

<sup>&</sup>lt;sup>1</sup> Technical Assistance committed amounts reflective of the master agreements with the providers.

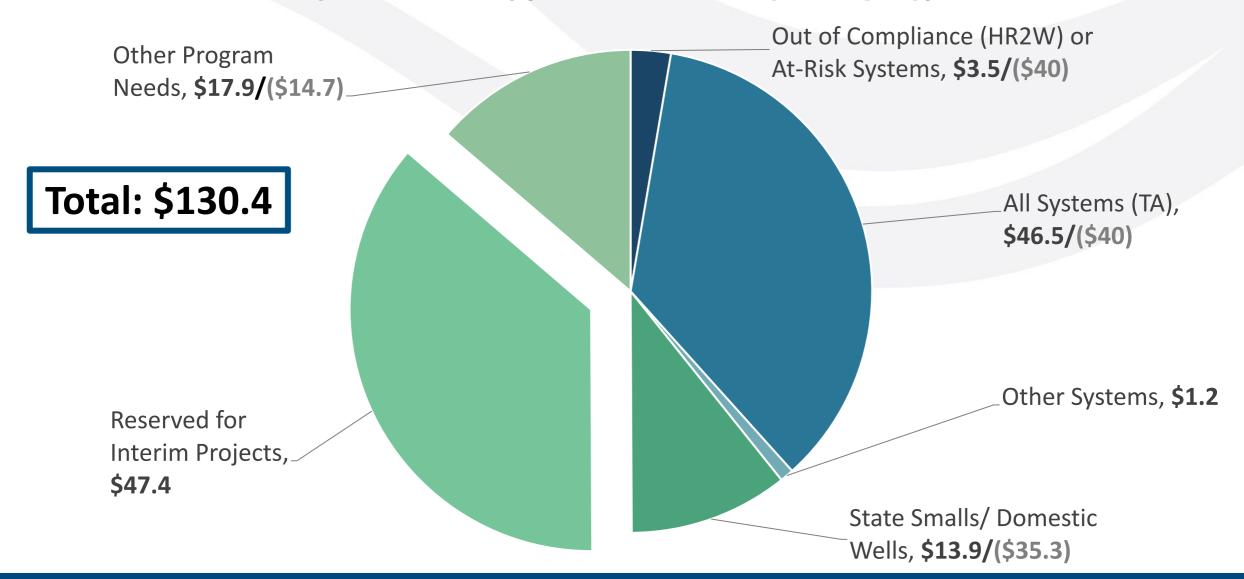

<sup>&</sup>lt;sup>2</sup> Parentheses shows Number of Agreements.

# Fiscal Year 2022-23

# FY 2022-23 SAFER Program Anticipated Available Funding

**TA** – Technical Assistance **DWSRF** – Drinking Water State Revolving

Fund

PFAS – Per- and Polyfluoroalkyl SubstancesSADW Fund – Safe and Affordable Drinking Water Fund

# Proposed Priorities (focus on small DACs and low-income households)

Emergency or urgent funding needs (only where other funds are not available).

Water systems that are out of compliance with primary drinking water standards or at-risk of failing.

Consolidations and promote opportunities for regional-scale consolidation accelerations.

Expedite planning through use of technical assistance.

Interim solutions and planning efforts for long-term solutions for state smalls and domestic wells.

Provide direct operation and maintenance support to assist water systems facing the highest affordability burdens.

Ensure assistance is distributed consistent with the State Water Board's Racial Equity Resolution and Racial Equity Action Plan.

# FY 2022-23 SADW Fund Proposed Targets (in millions)

|  | Solution Type                                |  |               |          |                          |                                |

# **Summary of Proposed FY 2022-23 Targets**

- Focus on small disadvantaged communities and low-income households.
- Investments proposed to address at risk state smalls/domestic wells for water quality and/or drought impacts.
- Technical Assistance funds focus on agreements with new providers to complete planning tasks that accelerate projects towards construction.
- Some funds to help establish additional administrator agreements.
- Some funds to further develop the direct operations and maintenance funding program.
- Planning and construction funds low due to large amount of funding available from the General Fund Infrastructure appropriation.

# Summary of Key Updates for Fiscal Year 2022-23

## **Summary of Updates for FY 2022-23**

- Direct operations and maintenance support added details to develop the O&M funding program.
- Construction developed conditions where eligible construction projects, including consolidations, may be funded with SADW Funds.
- Per- and polyfluoroalkyl substances (PFAS) added information on how a portion of state funding for PFAS will be used to meet SDACs needs.
- **Drought Infrastructure** added discussion on SB 552 requirements for small water suppliers and counties.
- Metrics and Performance added SAFER Program performance metric categories introduced in the SADW Fund Policy plus Racial Equity.

# FY 2022-23 Fund Expenditure Plan Timeline

2022

#### August

15 – Release of Draft FY 22-23 FEP

16 - Board Workshop

#### September

9 - SAFER AG Mtg #3

14 – End of Draft FY 22-23 FEP Comment Period

October November

1 – Board Consideration for Adoption

**AG** = Advisory Group

**FEP** = Fund Expenditure Plan

# **Questions?**

Comment or technical assistance, email <a href="mailto:safer@waterboards.ca.gov">safer@waterboards.ca.gov</a>

## **Discussion Questions**

1) What feedback do you have on the funding priorities?

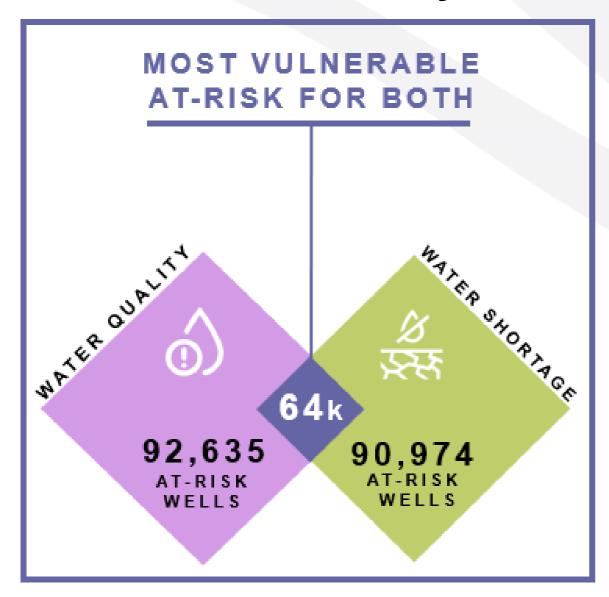

2) What feedback do you have on the funding allocations?

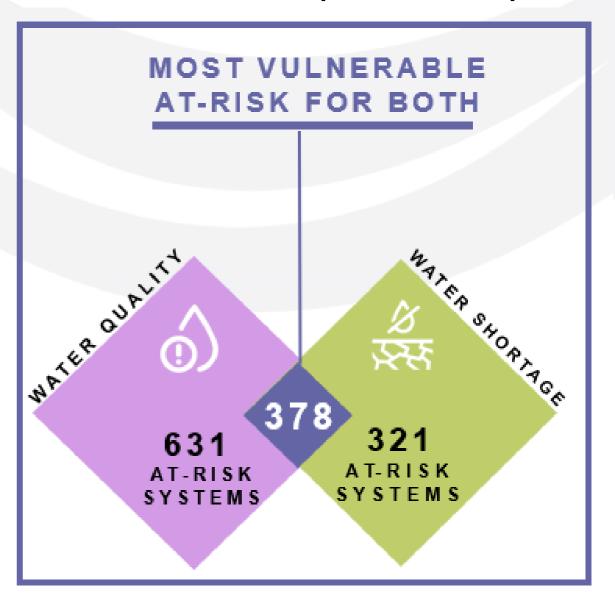

3) Would you recommend more or less allocated funds toward certain project types?

# LUNCH

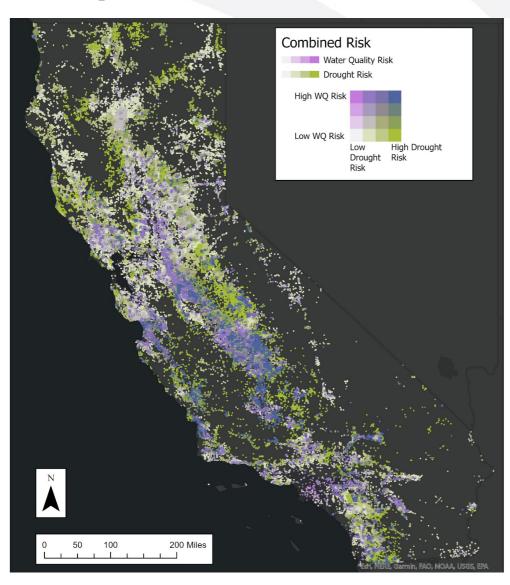

## State Small Water Systems and Domestic Wells (SSWS/DW)

# **Explore the Data: Combined Risk Assessment Map**

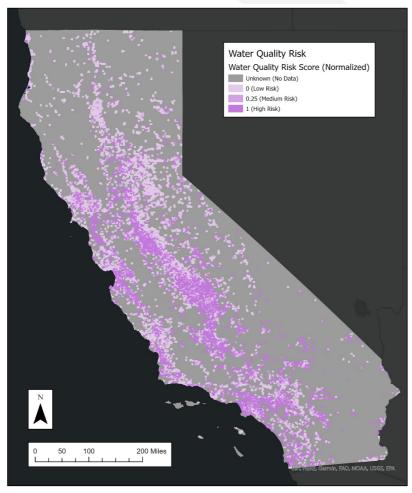

Map: https://bit.ly/3o2k7Qb

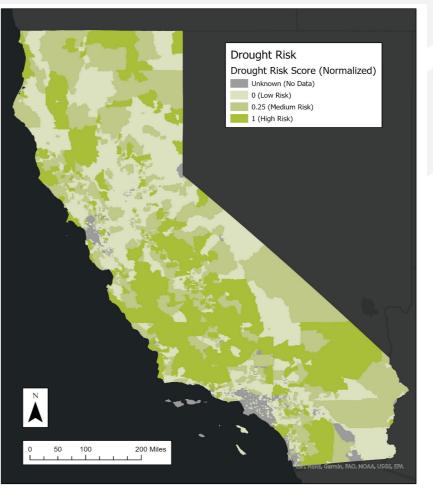

#### Map Features:

- Mask/un-mask areas with known SSWSs & domestic wells.
- Add layer to see CalEnviroScreen (CES) data for each census tract:
  - CES 4.0 score
  - Pollution burden
  - Population characteristics
  - Race/ethnicity population
  - Population living two times below the federal poverty level

# **Explore the Data: Water Quality & Drought Risk Maps**

Users can explore the results of the water quality and drought risk assessments separately.

#### Potential Solutions for State Smalls/Domestic Wells

## Funding for County-wide and Regional Programs

- Addresses water quality and/or water shortage issues:
  - Well sampling
  - Interim supplies (e.g., bottled or hauled water)
  - Long-term solutions (e.g., consolidation, treatment, well replacement)
- Promotes opportunities for consolidation, especially at a regional-scale
- Proposes Point-of-Use (POU) and Point-of-Entry (POE) Pilot

# **Current Regional/County-wide Program Enrollees**

(as of July 28, 2022)

| Recipient                | Regional Program                              | Enrolled<br>Households |
|--------------------------|---|------------------------|
| Self-Help<br>Enterprises | Bottled Water*                                | 1,956                  |
|                          | Tanks and Hauled<br>Water                     | 1,157                  |
| (San Joaquin<br>Valley)  | Household<br>POU/POE*                         | 114                    |
|                          | Well Replacement/<br>Repair and<br>Connection | 313                    |

| Recipient                              | Regional Program                  | Enrolled<br>Househol<br>ds |
|--|-----------------------------------|----------------------------|
| Tulare County                          | Countywide Bottled Water          | 1,110                      |
| Community<br>Water Center              | Bottled Water*<br>(Central Coast) | 198                        |
| Rural Community Assistance Corporation | Well Replacement (Statewide)      | 77                         |
| Shasta County                          | Well<br>Repair/Replacement        | 8                          |
| Santa Cruz<br>County                   | Well Testing and Hauled water*    | 0                          |

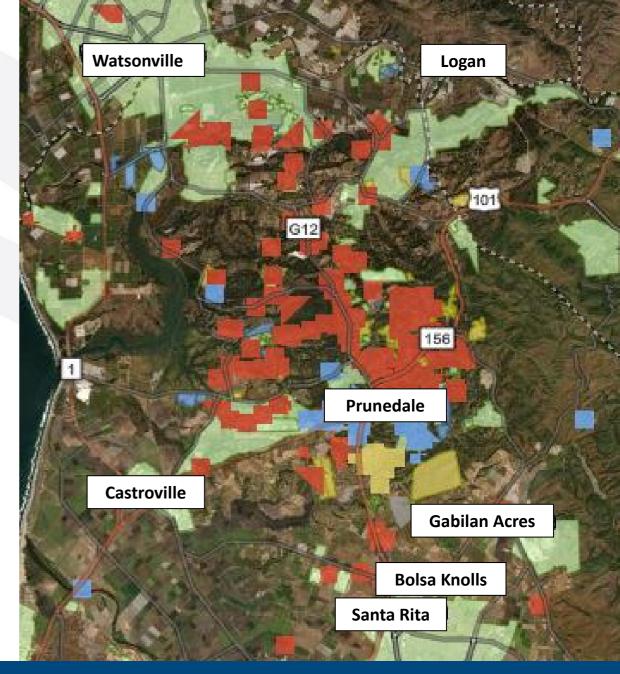

<sup>\*</sup> program also addresses water quality impacts

# DAC SSWs/DWs Partnership Projects

# **Existing consolidation projects**

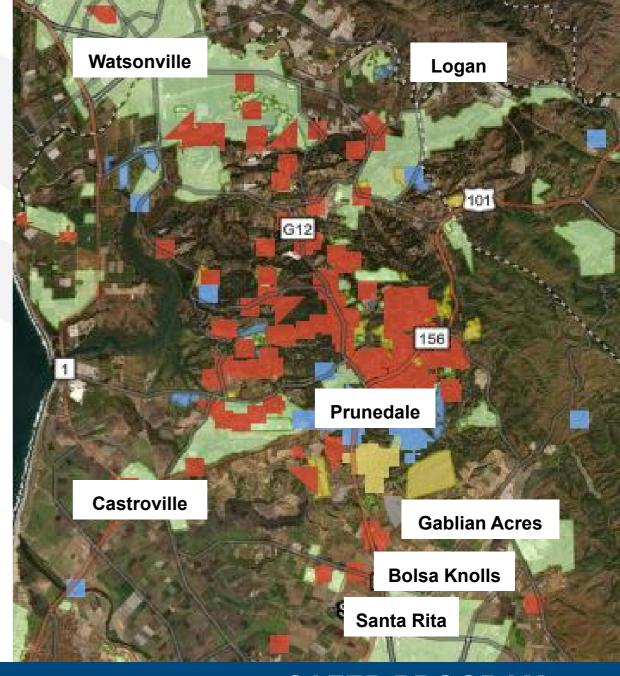

- Upper Lake (Lake)

   domestic wells with MTBE contamination
- City of Santa Rosa (Sonoma) state small water systems with arsenic contamination
- City of Stockton (Stanislaus) domestic wells with nitrate contamination
- Apple Avenue (Monterey) state small water systems in 1,2,3-TCP contaminated areas

# Larger Regional-Scale Consolidation Efforts

- Town of Mendocino (Mendocino) shallow, drought impacted DWs (~200)
- Olivehurst PUD (Yuba) connecting DWs with failing septic, methane (~185)
- City of Red Bluff (Tehama) connecting DWs with nitrate/failing septic (~500)
- Prunedale Area (Monterey) outreach SSWS opportunities (~250 WSs)

# SAFER Technical Assistance & Support for State Smalls and Domestic Wells

#### **County-wide and Regional Funding Programs**

- Can be used by Counties or their non-profit partners for: Outreach, bottled water, hauling, POU/POE, well repairs, small consolidations, etc.
- https://www.waterboards.ca.gov/safer/funding\_solicitation.html
- \* Most of the San Joaquin Valley are already supported by Self-Help Enterprises for the above.

#### **Baldwin Lake Area (San Bernardino)**

Feasibility study to address elevated uranium

#### **Tecopa Water Kiosk (Inyo)**

Water vending project seeking O&M support

#### **POU/POE Projects and Surface Water Issues**

- Imperial Valley (Imperial) POE implementation pilot project for surface water systems
- Clearlake Area (Lake) educational support for homes supplied directly by surface water

## **Discussion Questions**

1) What feedback do you have about the different approaches for state smalls and domestic wells?

2) Are there other approaches we should consider for state smalls/domestic wells?

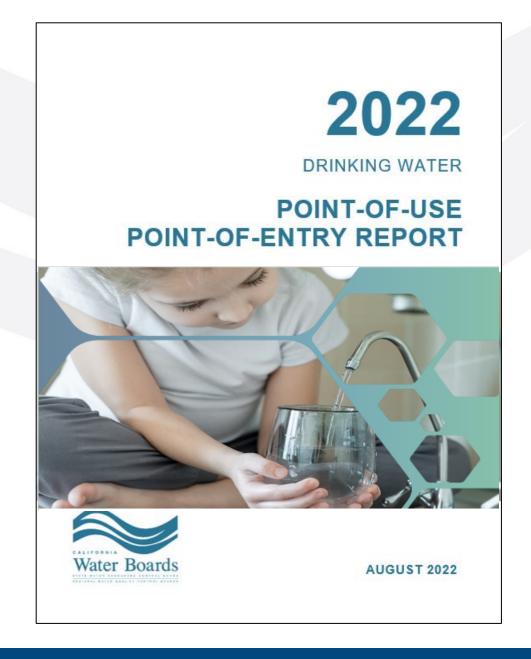

# Discussion Session #3: Original Water Solutions

Drinking Water Solutions
Point of Use and Point of Entry Report

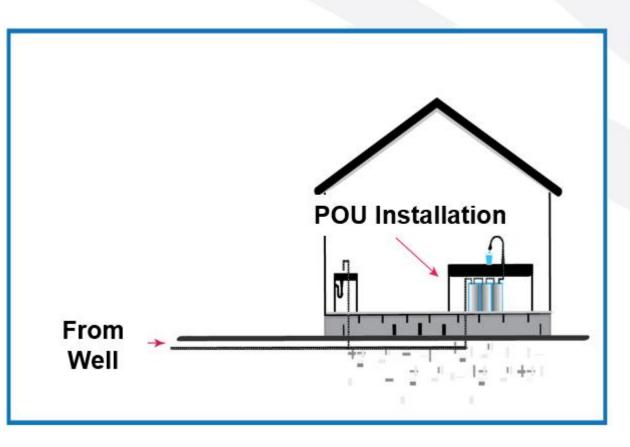

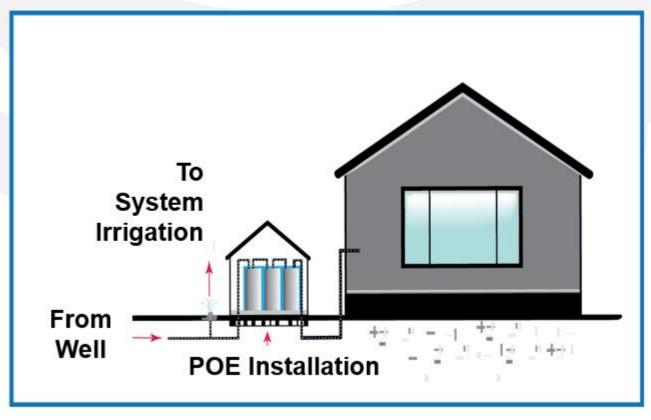

# Point of Use / Point of Entry (POU/POE) Report

- Understand use and obstacles to successful POU/POE implementation
- Draw conclusions and make recommendations
- Identify pilot studies to better understand and overcome obstacles

# Point of Use / Point of Entry

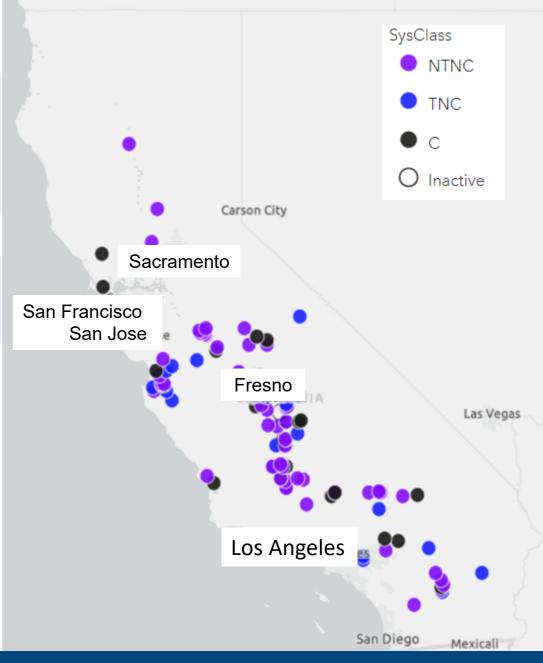

- POU Single treated access point
- POE Entire residence (internal use) receives treated water

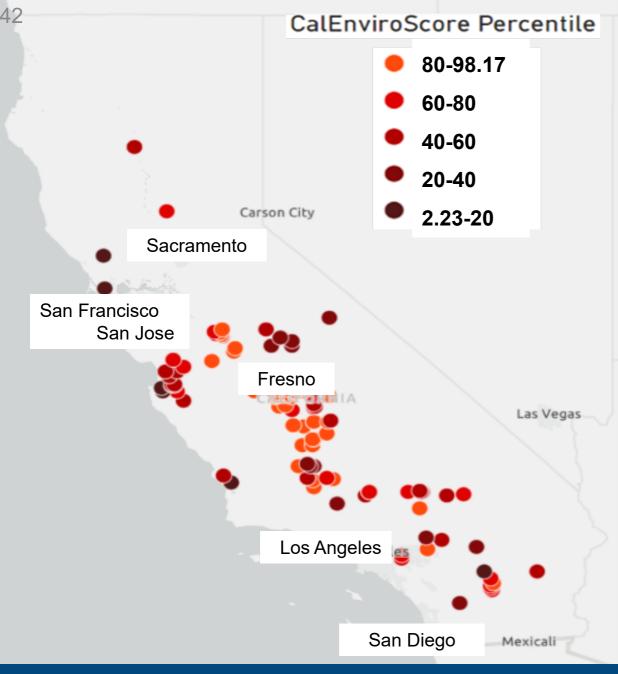

## Current POU/POE Treatment 122 Public Water Systems

| PWS<br>Classification       | Number of POU/POE Permitted PWS | Number of POU/POE Proposed PWS | Total Number of PWS with POU/POE |
|-----------------------------|---------------------------------|--------------------------------|----------------------------------|
| Community                   | 20                              | 6                              | 26                               |
| Non-transient non-community | 42                              | 27                             | 69                               |
| Transient                   | 22                              | 5                              | 27                               |

**NTNC** – Non-transient noncommunity **TNC** – Transient noncommunity

**C** – Community **Inactive** – Inactive water system

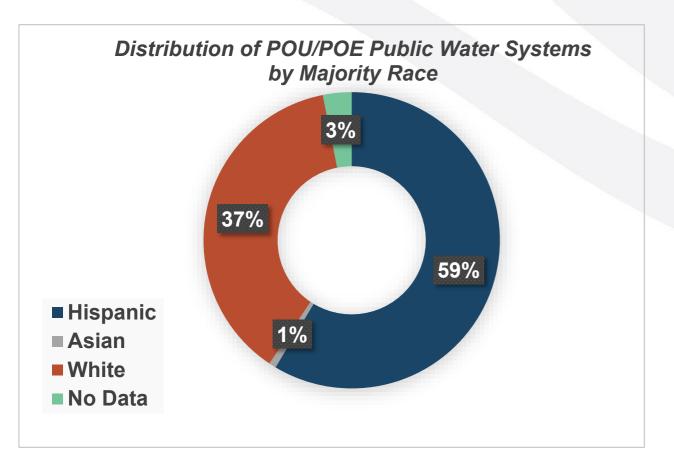

# **Equity Considerations**

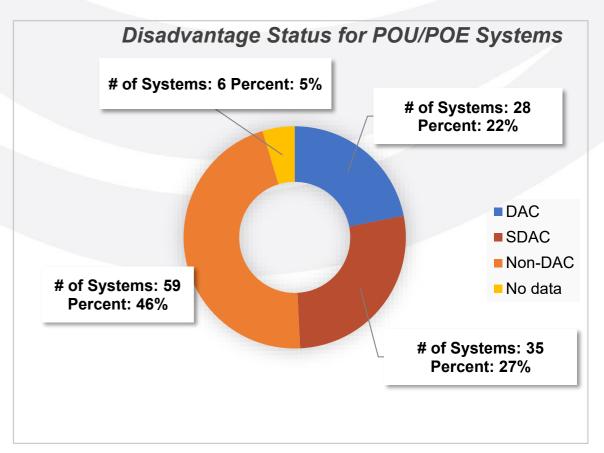

Majority race

Disadvantaged Communities

## **Equity Considerations** by Majority Race

# **Equity Considerations: Disadvantaged Communities**

**DAC** – Disadvantaged communities **SDAC** – Significantly disadvantaged communities

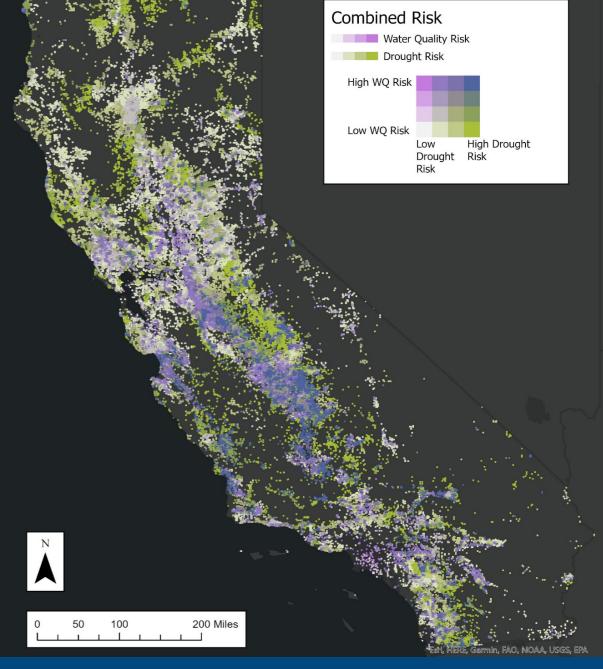

Non-DAC – Non-disadvantaged communities

**No Data** – no data for the corresponding public water system

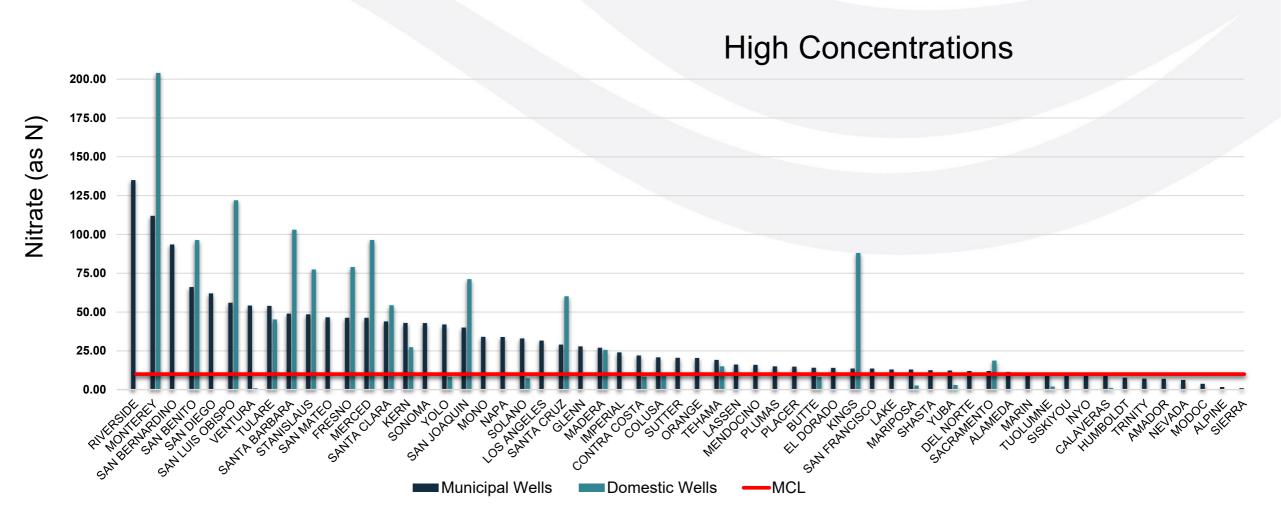

#### **Domestic Wells**

- SAFER Needs Assessment:
  - Water Quality Risk shows future needs
- Different paradigm than PWS:
  - Less oversight/support
  - Less sampling
  - County/Regional implementation

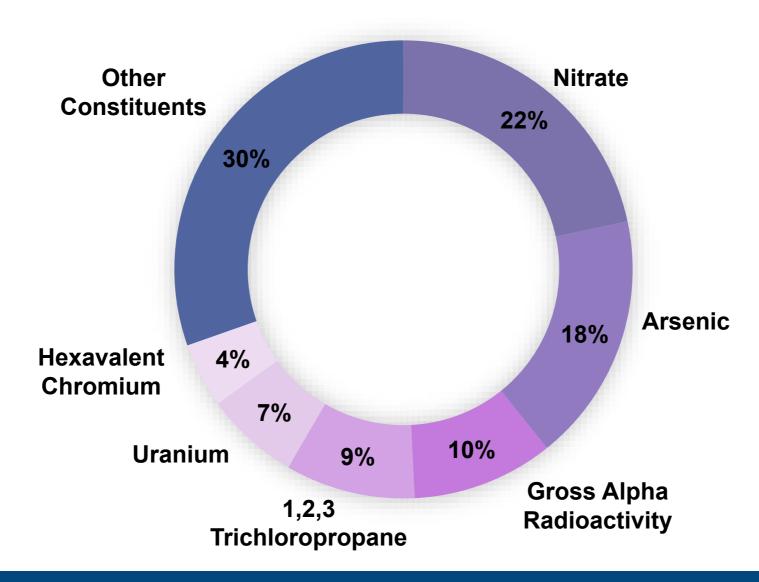

| System Type    | Long-Term<br>Solutions: POU<br>and POE | Interim Solution:<br>POU and POE |
|----------------|--|----------------------------------|
| PWS            | 106                                    | 196                              |
| SSWS           | 303                                    | 473                              |
| Domestic Wells | 36,911                                 | 55,888                           |

## **Water Quality Challenges**

# **Multiple Contaminants**

#### **Outreach**

- 1. What are the limitations/obstacles for POU/POE success?
- 2. Outreach Sessions
  - Practitioners / Technical Assistance
  - Local Government
  - Environmental Justice
  - Water Industry (Certifiers/Manufacturers)

# **Recommendation Highlights**

#### Equity

- Awareness and monitoring for equitable use of POU/POE
- Shift to POE for all long-term applications

#### Awareness

Multi-lingual informational materials

#### Outreach

- Establish regular community meetings in communities with POU/POE
- POU/POE Operator Education Cohort and Workforce Development

#### Technical

- Additional certification for California specific contaminants and high nitrate
- Bacteriological contamination alternatives

#### Legislative and Regulatory

Address 100% participation requirements & expedited process for interim solutions

#### **Pilot Studies**

#### Educational Strategy and Materials

Develop a strategy and multilingual materials to educate and involve individuals on POU/POE.

#### Performance Certification

- Applicable to POU and/or POE
- Develop performance certification for TCP, Cr6, uranium, high nitrate.

#### Bacteriological Contamination in Domestic Wells – Applicable to individual surface water

- Install UV disinfection in combination with POU/POE at domestic well residences.
- Gather data to determine real world pathogen reduction.

#### Smart Devices

- Continuous performance monitoring and less intrusive O&M.
- Real time device performance, optimized O&M and increased individual/community trust.

#### Operator Education Cohort

- Develop an educational program to implement POU/POE in communities.
- Workforce development, community outreach, trust building, installation, technical aspects, and O&M.

#### POU vs. POE

 Ease of installation, resident perception, ease of operation and maintenance, ease of access and treatment effectiveness.

### Conclusions

- Community/Individual trust determines success
- Share water treatment responsibility with residents
- POU/POE less sustainable solution, must track and consider equity
- POU/POE lack of educational resources and trusted specialized providers
- Installation and compliance is difficult
- Fundamental differences in implementation
- County/Regional Programs are needed to implement for DW/SSWS
- Device certification
- Bacteriological contamination is prevalent

### **Next steps to address Domestic Wells**

- State Water Board funded County/Regional programs
- Direct outreach to individuals
- Implement recommendations and pilot studies
- Resources website to support programs and individuals
- Regional water quality workshops

#### **Discussion Questions**

- 1. What strategies should local agencies use for outreach and education efforts?
- 2. For the workforce development pilot study, what is the best strategy to recruit people who are not involved in the water sector?
- 3. Based on the pilot studies proposed on slide 49, do you have suggestions for additional efforts?
- 4. For POU/POE solutions, what equity tracking metrics should be prioritized?
